SMYTHE
ESTABLISHED 1880

We buy, sell, and auction the very best in Paper Money, Antique Stocks and Bonds, Autographs, Coins, and Anything Relating to Financial History

TERMS OF SALE

1. **A 15% buyers charge will be added to the hammer price of each lot purchased.**

2. All bids are per lot as numbered in this catalogue.

3. Bids less than 60% of the estimate **will not be accepted.**

4. We reserve the right to withdraw any lot prior to sale.

5. All successful bidders shall be billed for postage, handling and insurance.

6. **We cannot be responsible for the loss of any merchandise shipped outside the United States.**

7. **All framed items are shipped at the purchaser's risk.**

8. R.M. SMYTHE reserves the right to **reject any bids not made in good faith and further reserves the right to ban any bidder from participation in its sales for any reason deemed appropriate at our sole discretion.**

9. A R.M. SMYTHE auction bidder expressly waives any claim or right to any accounting, damages or compensation arising out of R.M. SMYTHE'S failure to receive or execute any bid due to exclusion from our sales, clerical errors or other causes. No bids will be accepted from any person who has not signed a registration form or a bidder sheet.

10. United States coins and currency will not, in conformity with law, be opened at less than face value.

11. No "buy" or "unlimited" bids will be accepted. We will act as agents for all mail bidders in the sale. Mail bids below the low estimate will not be reduced. Mail bids will be opened at the next interval over the second highest bid except where the rarity or regular market worth of the item dictates an opening at or near market value. Floor bidding intervals will have an average increment of about 10% at the discretion of the auctioneer. "Cut" bids (bids at less than the regular bidding interval) will be accepted, but they must be no less than half of the regular interval over the previous bid. Each bidder may make only one "cut" bid per lot and if they are outbid, they may make no further bids on that lot.

12. In the event of a tie between a mail bidder on the book and a bidder on the floor, the mail bidder shall take precedence.

13. All bids must be in whole dollar amounts. Percentage increases **will be** rounded up to the nearest dollar.

14. Check your bid sheets carefully. We can not assume any **responsibility** for errors made in the amount bid or lot numbers listed. **Make sure your** sheet is signed.

15. No minor may participate in our sales. **Agents bidding on behalf of others will be held liable if their principals fail to make payment.**

16. Payment for purchases is to be made by cash, check, money order or bank wire upon receipt of invoice. No lots may be taken away unless paid for in full. A late charge of 1 1/2% per month will be charged on the invoice total if payment is not received within 10 days of mailing the invoice. Bidders not known to us are required to deposit 25% of their total bids in advance. **Credit cards will not be accepted for auction purchases.**

17. Title does not pass until payment in full is received. R.M. SMYTHE reserves the right to await clearance of remittance before making delivery.

18. If a collection agency or attorney is required to collect outstanding accounts, all agency and court costs, witness and attorney fees and all other costs of any kind incurred by R.M. SMYTHE in procuring judgement shall be borne by the defendant. The signer of a R.M. SMYTHE bid sheet or participant in the auction consents to the jurisdiction of the courts of the U.S. in New York City or the New York State courts as R.M. SMYTHE alone shall elect. The participant in a R.M. SMYTHE auction also assumes both corporate and personal liability for unpaid auction bills.

19. R.M. SMYTHE may reopen the bidding on a lot under the following circumstances: 1) R.M. SMYTHE has failed to execute correctly a mail bid. 2) A party purchasing the lot on the floor has claimed an error. 3) Where a protest is made after the hammer has fallen but before bidding has commenced on the next lot. 4) Where the auctioneer has determined that he has overlooked a party still bidding on the lot but before the calling of the next lot. 5) At the discretion of the auctioneer.

20. In the event of dispute, the auctioneer's decision is final.

21. New York State & Pennsylvania State sales taxes or other state sales or use taxes shall be levied, as required by law. Dealers and other non residents are reminded that sales tax must be collected unless Form ST-128.1 has been filed properly, under regulations effective 1 December 1982.

22. No price adjustments will be made on the hammer price of a lot whether there is a complaint about the whole lot or only one item in it. The entire lot must be returned if a refund is to be made.

23. In the event of unsuccessful litigation the plaintiff shall pay R.M. SMYTHE'S legal costs, counsel and witness fees and all other costs incurred by it in defense against such suit together with interest on any funds expended at the New York prime rate from the date of actual disbursement.

24. The same protections applicable to R.M. SMYTHE apply to each and every one of their officers and employees unless they shall be convicted of knowingly selling false or stolen goods.

25. R.M. SMYTHE assumes no liability for merchandise lost, stolen or damaged while in the possession of a party to whom merchandise has been shipped. The purchaser is solely responsible for the safe keeping and insurance of any items in their possession.

26. All accounts are payable to R.M. SMYTHE in U.S. funds and remittances must cover the service charges for foreign drafts which shall be added to each invoice.

27. **All material in this catalogue is unconditionally guaranteed to be genuine. We will not knowingly sell any item that has been "repaired", "restored", "processed", "cleaned", "pressed", or "conserved" in any way without disclosing those facts to the potential buyer.**

28. Agents who bid from the floor for clients should examine the lots carefully, and are reminded that no lots may be returned by floor bidders except for non-authenticity. Lots described as "repaired", "corroded", "holed", "whizzed", or like damage may not be returned for any reason except non-authenticity.

29. Mail bidders may return lots for reasons of non-authenticity or improper description within 5 days of receipt or thirty days from the auction's last day, whichever comes first. Third-party graded coins (i.e. PCGS, NGC, ANACS, ICG) are **sold as is, no returns.** Failure to execute this privilege in a timely manner either from a failure to pay promptly or from any other cause shall void it. Lots sold with the proviso 'sold as is' cannot be returned. Lots valued primarily for their bullion content may not be returned.

30. In cases where a question has arisen as to the authenticity of an item, the purchaser must, before settlement day (30 days after the sale,) notify R.M. SMYTHE of his intention to return the item, confirmed in writing. The item will be examined by a recognized expert: if the item proves authentic, the sale will be consummated. If the item is not authentic, the sale price will be refunded.

31. The auctioneer reserves the right to postpone the sale by auction for a reasonable period of time as a result of any significant event which, in the sole discretion of the auctioneer, makes it advisable to postpone the event. No prospective bidder or prospective buyer shall have recourse as a result of any postponement.

32. The placing of a bid shall constitute **full acceptance of the fore-going terms and conditions of sale; all bid sheets must be signed by the responsible party.**

33. A $100 charge will be applied for any check that fails to clear.

Scripophily Condition Terminology

Unlike coins and paper money, the grading of stocks & bonds has not developed to the point where everyone agrees on or uses similar standards. The very nature of stocks and bonds defies a grading system based, for example, on wear, or folds.

Instead of trying to develop a strict grading system, we have used terminology designed to convey a strictly subjective impression of the items we endeavor to describe.

Fair – A certificate with extreme handling, fold splitting, stains, small pieces or tears.

Fine – Slightly below average. Folds may be heavy with splits slightly into the design elements, but with no pieces missing. More severe flaws will be mentioned.

Very Fine (VF) – The average grade of most of the stocks and bonds we encounter. A **Very Fine** share certificate will have several light to moderate folds, and the paper will show obvious wear or softness. Bonds that were originally folded by the printer may have several additional folds. There may be minor edge roughness, but any splits that extend into the designs will be described. Very light soiling is typical, but heavier stains or foxing will be mentioned.

Very Fine+ (VF+) – Obviously used or worn, but brighter or cleaner than the average example.

Extremely Fine (EF) – A well above average example. Stocks may show a few light to moderate folds. Bonds that were originally folded may have a few light to moderate extra folds. The paper will retain most of the original crispness and brightness. The margins will be free from noticeable edge splits, stains or other problems.

Extremely Fine+ (EF+) – As made, or nearly so.

"*" following a grade means there are no cancellations.

(np) indicates the item is not pictured.

The Clarence Rareshide Collection of Obsolete and Confederate Currency
Confederate Currency & Bonds
Wisconsin Selections from Chet Krause's Collection

Clarence Rareshide was, for 50 years, an avid and discerning collector of coins and currency. The pastime that began with a childhood stamp collection became his profession in 1962. He was an expert on obsolete U.S. currency and renowned for his knowledge of Confederate and Louisiana bank notes.

Rareshide's prodigious memory ensured that he was widely consulted in numismatic circles. He was a contributing author to "U.S. Obsolete Bank Notes, Volume 1, 1782-1866" by James Haxby. He was a member of the American Numismatic Association and helped to administer the ANA conventions held in New Orleans in 1972 and 1981. He was a frequent speaker on numismatic subjects.

Rareshide was a lifelong resident of New Orleans, and his personal style reflected the elegance and flair of his native city. He was always dressed in a suit and tie, even away from the bourse, and possessed a formidable collection of handmade English shoes.

He was the father of 9 children and had 16 grandchildren. He and his wife of 48 years, the former Elisabeth Ainsworth, graduated together from Loyola University in 1954; Rareshide also earned a law degree in 1962. The law, however, could never compete with the attractions of collecting, and the Clarence Rareshide Collection is a reflection of his connoisseurship and expertise.

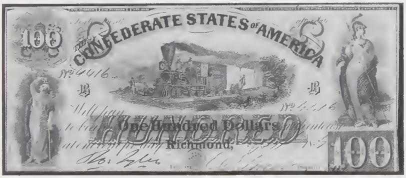
Confederate Currency

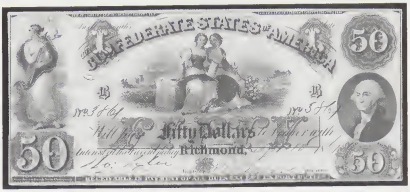
WHAT IS....CONFEDERATE CURRENCY?

The Civil Was is one of the greatest areas for collecting and research that exists in numismatics. Confederate and southern states currency is obviously a direct spin-off of that conflict. On February 4, 1861, a provisional government for the secessionist states was organized at Montgomery, Alabama. Two months later, the first of many emissions of Confederate paper money was issued. The south had a severe lack of resources and backing for its monetary emissions, so the printing press became its most valuable tool in helping to pay for war. A multitude of paper money issues as well as bonds were produced from mid-1861 through early 1865. These quickly lost value through inflation and the tides of war. By 1865, Confederate paper was virtually worthless. Printing quality was extremely variable, as was the supply of paper, materials, and qualified printers. Thus, the early issues of the Confederacy show great diversity in design and execution. Gradually, more standardization was implemented: the final government paper money issue of 1864 is quite uniform in many respects.

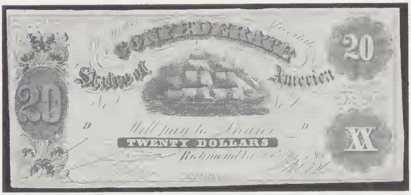
The 11 southern states compromising the Confederacy also supplied their cities and towns with a wide variety of notes. These ranged from state-backed issues to privately produced scrip and also included a large variety of obsolete currency. The shortage of circulating coin in the South was no less severe than in the North: scrip issues in low denominations similar in character to those of the north were used in many areas of the South. Issuers included private banks, municipal treasuries, private corporations, railroads and individuals.



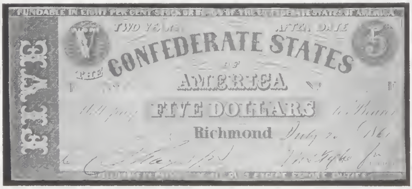
1327 **$100.** B. T-5. Cr.5. No.4416. Train, Hudson River beyond. Justice, left. Minerva, right. Vivid green overprint. Red fiber paper. A beautiful note, printed by the Southern Bank Note Company. This was the politically correct name adopted by the New Orleans branch of the American Bank Note Company. This example was disbursed on September 17, 1861 by CSA Captain Ferdinand Molloy, as noted on the back in his hand. There is none of the typical bleed through from the back endorsements; in fact, this note is as bright and fresh as if it was issued yesterday. **Choice AU,** but trimmed well into the bottom border. *($3,000-5,000)*



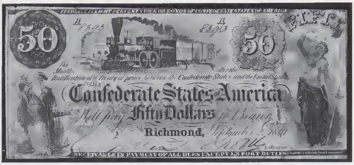
1328 **$50.** B. T-6. Cr.6. No.3861. Agriculture and Industry sit on cotton bale. Justice, left. Washington, right. This note has great color, and nice margins. **Uncirculated,** and many would consider it Choice. Just a touch of light teller handling. *($5,000-6,000)*



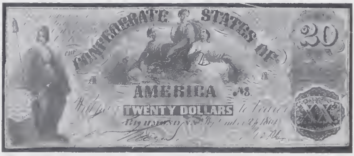
1329 **$20.** D. T-9. Cr.32. No.70171. Sailing ship. There are two extraneous dots next to the first plate letter. **EF,** with three very ample margins. *($300-400)*



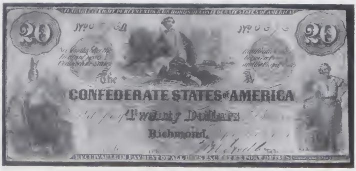
1330 **$5.** F. T-12. Cr.46. No.2361. J. Manouvrier produced this note in August of 1861, and he relied on the blue back, rather than on an elaborate scene on the front, to protect against counterfeiting. The blue backs tended to fade; the $10 notes he printed were pilfered in transit, and the Treasury turned to other printers to produce the rest of the CSA notes and bonds. **F-VF,** just a touch of soiling on the back, but still quite presentable. *($4,000-6,000)*



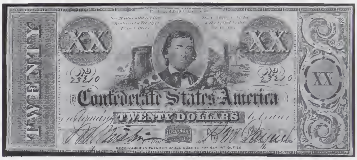
1331 **$50.** A. T-15. Cr.79. No.8393. Passenger train. Hope with anchor, left. Justice, right. One of the most popular CSA types, and very difficult to obtain in high grades. This example is a picture perfect Fine-Very Fine, with nice color, and decent margins. Unfortunately, the right end is stained, or scorched. **F-VF,** with stains. *($2,000-3,000)*



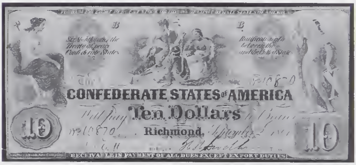
1332 **$20.** A. T-17. Cr.99. No.9503. Commerce, Ceres, and Navigation, center. Liberty, left. Lovely green tint. **Fine,** but there is a stain in the lower right corner, and the surface is scratched near the left side. *($600-900)*



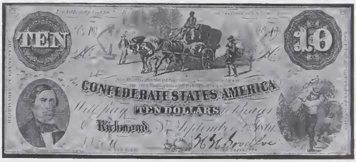
1333 **$20.** A. T-19. Cr.137. No.5373. Navigation seated by charts and globe. Minerva, left. Blacksmith, right. Brilliant orange overprint. Perhaps the nicest of the Southern Bank Note Company products, and one of the keys to any Confederate "type" set. **VF,** or so, with three decent margins, but trimmed in a bit along the right side. *($3,000-5,000)*



1334 **$20.** Z. T-21. Cr.145. No.23210. Alexander Stephens, Confederate vice president. Dark green overprint. The color is very strong, but the note is trimmed into the bottom border just a bit. **EF-AU,** light mounting hinge remnants on the back. *($500-750)*



1335 **$10.** B. T-22. Cr.151. No.10870. Indian family. Thetis with trident, left. Maiden holds corn, right. Pretty orange overprints. **F-VF.** *($1,000-1,500)*



1336 **$10.** T-23. Cr.253. No.2991. Cotton wagon. "The Corn Gatherer", right. **VF-EF,** with clear margins all around. Bright orange overprint. *($3,500-4,500)*

1337 **$10.** A. T-27. Cr.221. No.1444. Liberty, eagle and shield. One of the rarest CSA types, with just 8,576 notes issued (compare this to T-68, with 9,145,000 issued!) While the graphics are not quite as exciting as on the T-35 Indian Princess note, these are almost always on the want lists of serious collectors. Due to this type's rarity, many T-27s have been "restored", "conserved", or "repaired", and in other ways made to look better than they actually are. We cannot detect any such "improvements" on this very decent example. **VG,** trimmed just into the top border. ***($8,000-12,000)***

Controversy has swirled around the two notes known as "essays" for over one hundred years. The evidence certainly indicates they were not officially issued. There is no record of them in the Thian Register of the Confederate Debt. No respectable printer would deliver bank notes to a customer with the printer's name spelled wrong (Keatings and Ball, instead of Keatinge and Ball). No other CSA notes were printed on this particular paper. No CSA notes with printed signatures were issued, except for the 50 Cent notes. On the other hand, "essay" notes have been found in original hoards of CSA paper, proving that they were contemporary to the Confederacy, and many were heavily circulated. Almost every major collector of CSA currency has included these "essays" in their "type" holdings. These notes are rarely offered, and prices fluctuate according to demand. Lately, CSA contemporary counterfeits have been bringing astonishing prices, so our estimates may be exceeded.

1353 **State of North Carolina.** October 2, 1861. **$2.** Cr.23. **Serial No.1.** The **extremely rare** imprint of the "N.C. Inst. Deaf & Dumb, Print." at the lower left. The key type in a set of North Carolina State notes and on the entire Southern States series. Very few exist in any condition. According to Confederate and Southern States specialist and dealer Hugh Shull, perhaps **fewer than ten are known in all grades.** We have handled only a few examples of this historic note in our auction sales spanning from the early NASCA days of 1977 with Douglas Ball cataloguing to the present era of Smythe. However, none **compare with this extraordinary Number 1 note.** There are number 1 notes known on several available types in the Southern series, but none to our recollection on an extremely rare type such as this. Not only that, but this note falls in the middle of the superior condition range of notes we have examined. The last Criswell catalogue prices the type at $8,000.00. The Criswell plate note appears to be Extremely Fine. The John Ford Collection note (Ex. Criswell, catalogued for Stack's May 26, 2005 Ford X Auction) is Very Fine. This note is superior to the Ex. Sam Roakes Collection note we recently sold. **Fine to Very Fine.** A bit soft, but for this type of paper the grade is accurate. Two back stamp hinges at the top edge. A very minor stain at the lower left. A **stupendous note** on the State – this is a memorable offering for the astute North Carolina and Southern State collector who recognizes the importance of this magnificent note. Worthy of a runaway price! ***($8,000-12,000)***

Probably Unique Mesilla, Arizona Confederate Period Buchoz, Grandjean & Company $10 Scrip Note Tied to the Historic Confederate Occupation of the Arizona Territory

~~John W. Quincy & Co.~~

DOLLARS

$10.00

1354 **Confederate Territory of Arizona.** *Mesilla, Arizona*. Buchoz, Grandjean & Co. **$10.00.** May 21, 1862. No.15. Written denomination bearer note, "Pay to the Bearer", hand accomplished, on printed crossed off titled draft form for John W. Quincy & Co., 98 William Street, N.Y. "Redeemable in Confederate Treasury Notes to be presented in sums of Twenty Dollars". Signed at the lower right by ***Buchoz.*** At the lower left, "Redeemable at Mesilla + Las Cruses". The part printed form in red ink, *America* seated at the lower left. Borders with denominational protectors. Imprint of Robertson, Sieber, & Sherman, 93 Fulton St., N.Y. An amazing currency form referred to in a 1996 Grover Criswell letter (copy enclosed) as a "Quasi-governmental" draft. The denomination clearly shows that this was meant to circulate, and the emergency conditions of this far reaching theatre of Confederate operations made such a bill on top of an existing sight form an efficient means to create a circulating currency. The appearance of **Fine** and with sharp color. However, the draft had many splits on the folds and these have the old fashioned glued together repairs from long ago. However, where it counts, appearance wise this note is lovely. **Excessively Rare,** and we have seen nothing like it to our recollection. There were no such forms on the Arizona Occupation in our 1987 Ball-Richmond Sale. The postal history of this Confederate period is very rare and well collected. Several pieces of that postal history have sold well into the five figures in the past. This note, not only Western in nature, but also from the farthest western Confederate military outpost is up there with the highest caliber Sutler notes and other Southern note rarities. The recent sale of the Alabama Territorial scrip note at the January, 2005 Ford VIII sale for a record $27,600.00 has led collectors to rethink the value of impact notes of this nature. The finest Confederate era history combined with what may be a unique piece is a tremendous opportunity. ***($12,000-18,000)***

Redeemable
at Mesilla +
Las Cruses

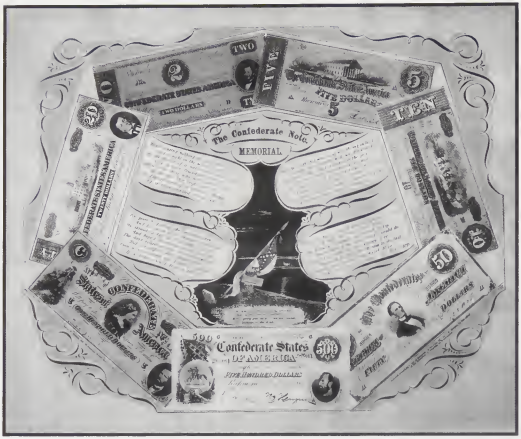
The currency notes known on Mesilla, Arizona (very rarely seen, the last in Stack's 2000 Americana Sale) are the scrip notes of William Skillman, operator of the Post Office, store and train station. Skillman's notes are dated May 15, 1862, and are for less than one dollar. This higher denomination note was certainly useful in the absence of higher denomination bills not issued by Skillman. In the small world of Mesilla, Buchoz and Skillman were likely well known to each other.

The Confederate War history this far west is not well known, yet is quite fascinating. Early in 1862, a large Confederate force entered what is present day New Mexico. Texas seceded from the Union, Fort Bliss at El Paso was evacuated and captured by the Grays, who continued onwards to Fort Fillmore. Fillmore had also been abandoned by the Union forces. With Mes(or "x")illa as the capital, the Confederate Territory of Arizona was created.

Meanwhile, farther north, the Union regrouped under Colonel Edward Canby. The Confederates under Brigidier General Henry H. Sibley arrived at their newly acquired stronghold at Fort Bliss, then headed north on the Camino Real to engage the Union. Canby had 3,800 men including Kit Carson's 1st New Mexico Volunteers (mostly Hispanic fighters from northern New Mexico). Sibley counted only 2,500 men and fifteen cannons for their battle on February 13, 1862. Both sides suffered greatly amidst harsh winter conditions of dust and bad weather. The Union retreated into Fort Craig, but fortunately for Canby and his men, Sibley could not muster up the resources for a siege. Instead, Sibley had to head for Albuquerque to regroup. The Confederates were eventually defeated on March 28, 1862, at the Battle of Gioreta and retreated to Texas.

The Buchoz notes may have been created for use as pay vouchers for the fighters. However, this example has no verso endorsements of any kind, common to such bearer notes. The great rarity of this type leads us to the conclusion that they were redeemed for Confederate notes and destroyed. Skillman's change bills are also very rare, and appear to have been nearly all redeemed as such. Their creation may only have been due to Buchoz & Co. needing a resource to stimulate commerce in Mesilla while awaiting the Condeferate Treasury notes to arrive from the East through the often broken and unstable lines. It is theories and hypotheses such as these that make such financial instruments truly interesting historical documents of the period and the day to day lives of the participants.

“The Confederate Note Memorial” by Moore



1355 **Framed Confederate Display Piece, C.F. Moores’ 1871 “The Confederate Note Memorial” Montage.** Image surface 21.0” by 17.5”, framed in (likely original) brass gilt border wood frame. Printed color scroll backing with seven genuine Confederate Treasury notes arranged clockwise and overlapping, mounted to the board. The notes enclose four printed italicized texts composing a prose about the Confederate notes and the effects on the Nation. At the bottom, the Confederate Flag over the grave of the “Unknown” Soldier. The notes clockwise from the top feature 1864 $2, 1864 $5, 1864 $10, 1864 $50, at the base is the 1864 $500 Stonewall Jackson type, 1864 $100, and finishing at the top left and overlapping the deuce, is a 1864 $20. At the lower right is C.F. Moore’s patent and date 1871, entered “according to act of Congress..” and also “...of the Librarian of Congress at Washington.” A striking display piece and we don’t recall handling one before. Probably 500 times rarer than a Fractional Currency shield. A minor hint of bottom edge water staining. Some toning on the notes and board, but the condition is **Very Fine.** The frame is also excellent quality. Ready to hang and display. ***($2,000-4,000)***

From the texts: *“Too poor to possess the precious ores,/And too much of a stranger to borrow:/We issued to-day our “Promise to pay,”/And hoped to redeem on the morrow.”....*

Comprehensive Catalog and History of Confederate Bonds **$45.00**
By Douglas B. Ball, Ph.D.
1998. 288pp, hard cover.
In the book that renders all previous Confederate Bond references obsolete, Ball identifies close to 400 different Confederate Bond varieties including several great rarities unlisted until now. Hundreds of illustrations help even the most inexperienced collector match a bond to its catalogue listing. In addition, the book gives an in-depth history of the bond signers, the printers, the legislation, the Coutts Bank Hoard, and more, such as new, up to date rarity listings for every bond; prices for two different grades; number range information not available in any similar publication; and comprehensive “Ball” numbers for all listed bonds (plus a cross-reference to Criswell numbers). This is far and away the best book on the subject of Confederate Bonds. Order today and reap the benefit of Dr. Ball’s many years of dedicated research.

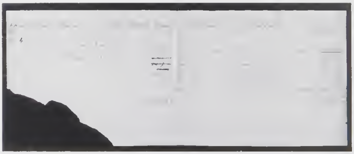
1384 **Important Letter from Memminger to Louis Cruger.** June 1st, 1864. In this two-page letter, on CSA Treasury Department stationery, CSA Secretary of the Treasury Memminger writes to his Comptroller about the adjustment of accounts for Foreign Agents and Depositories. He states that foreign agents are by no means as desirable as the citizens of his own country. He announces the appointment of Fraser, Trenholm & Co. as Depository and Agents at Liverpool. Norman S. Walker is the agent for Bermuda, Louis Heyliger at Nassau, and Charles J. Helm at Havana. They are to be paid up to $2,500 per year, "...in the Currency of the place of their Domicile, which in each case is Coin...." Signed by C. G. Memminger. **VF-EF,** boldly signed. *($2,000-3,000)*



1385 **Ledger Page from a CSA Account Book Stating the Salaries Paid to CSA Commissioner to France, John Slidell.** Measuring about 19" x 7 1/2" on blue and red lined paper. The lower left portion is missing, but the rest of the document is in excellent condition. The date "1864", and the last part of Judah P. Benjamin's signature remains at lower left, where he approved the document. Payments to Slidell began in September of 1861, when he received an advance of $5,842 in Richmond. Two months later, Slidell, and James Mason, the CSA Commissioner to England, were taken off the British ship, *Trent,* by Captain Wilkes of the U. S. Navy. This became an international incident that finally ended with the pair's release, perhaps preventing Great Britain from entering the War on the CSA side. The next entry in the journal is dated April 12, 1862, showing that a draft for 675 British Pounds was redeemed in Slidell's favor. The final entry is dated January 22, 1864. An important fiscal document recording payments to the CSA Commissioner to France. *($3,000-5,000)*

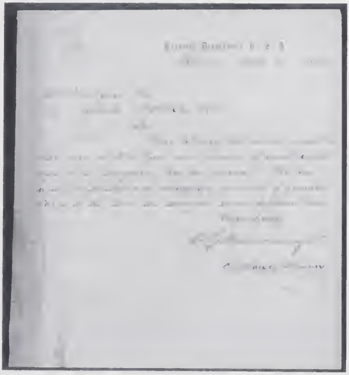
1386 **Ledger Page from a CSA Account Book Stating the Salaries Paid to Charles J. Helm, CSA Commissioner to Cuba.** Similar to the previous item, but this document is complete. Helm is mentioned in the letter by Memminger in an earlier lot, described above. J. P. Benjamin, Jewish CSA Secretary of State, approves the entries by signing, lower left. Memminger's letter authorizes the Comptroller to pay Helm up to $2,500 per annum. Why there is a discrepancy is a mystery that will require some further research. Approximately 19" x 7 1/2", and very impressive in appearance. **VF-EF,** there have been some very professional repairs made to fold splits, but none affecting the bold Judah P. Benjamin signature. *($3,000-5,000)*



1387 **Letter From CSA Secretary of the Treasury to the Collector at St. Marks, Florida.** On CSA Treasury Department letterhead dated October 8, 1862, Richmond. Memminger writes to A. B. The significance of these red numbers is not yet known. There are two opposing theories. One group says they are Trans-Mississippi issues, and the other group says that the numbers indicate that the notes were brought in by the owners and verified to be genuine. More research is needed on this issue, but one thing is clear. These red numbers are rarely encountered.

Wisconsin Duplicates from Chet Krause's Collection

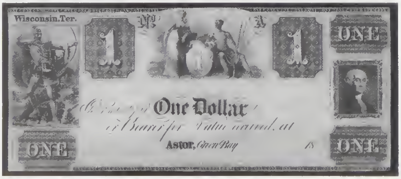
In 1952 Chet Krause founded Krause publications by producing a single-page introductory issue of Numismatic News on the dining room table of his parents' home. From that modest start Chet built a publishing empire in Iola, Wisconsin, that grew and prospered, fueled by his passion for collecting, and his extraordinary managerial skills. He has had a long, and successful career in numismatics and in business. In 1990 Chet was named Wisconsin Small Business Person of the Year. In 1999 he received the ANA Numismatist of the Year Award.

Along the way, against some very strong competition, Chet put together an incredible collection of Wisconsin paper money, perhaps unrivaled in its vastness and completeness. In 1994, he used his collection as the basis for Wisconsin Obsolete Bank Notes and Scrip, the definitive book on the subject. He continues to add to that collection today.

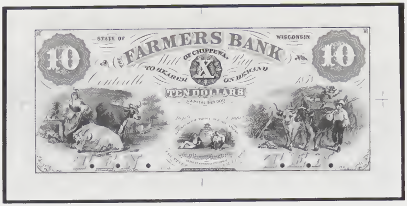
Fortunately for us, and for collectors of Wisconsin obsolete bank notes, Chet recently reviewed his collection and noticed that there were some notes he had acquired more than once.

Despite their rarity and quality, the notes presented in this section include only his duplicates. There are over forty different examples from the early Territorial period, and many notes you may not see offered again for decades. Don't miss this golden opportunity!

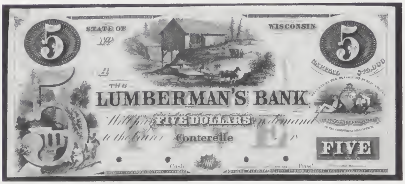
Rare Territorial



1478 **WI.** *Astor, Green Bay, Wisconsin Ter.* Private Scrip. **$1.** 1830s. (WI-13 SC-7). Unissued remainder. Liberty and Indian, seated, flank shield with 1 Indian with bow and arrow, left. Washington, right. John Jacob Astor did his trading there. An important scrip with the "Ter." designation. These only come unissued to our knowledge and this denomination is much rarer than a change bill on the issuer. RWH. R-6. **VF**, mounted on thick paper, light aging. ***($600-900)***



1479 **WI.** *Conterelle.* Farmers Bank of Chippewa. **$10.** 1858. (WI-105 G8a). Red. **Proof** on India paper mounted on card. Woman with cows, left. Boy asleep in ox cart, right. Whether or not this bank actually opened is not confirmed. There were ten of these in the ABN archive sale, where they each brought $500 in 1990. The plate was officially altered to the Farmers Bank, Two Rivers, WI-800. ABN. **Gem Uncirculated.** ***($1,000-1,500)***



1480 **WI.** *Conterelle.* Lumberman's Bank. **$5.** 1850s. (WI-810,G-6). **Proof** on India paper. **Plate Note in Krause.** Lumber mill. Indians in front of a large, ornate 5, with train beyond. The original capital of this bank was $200,000. Organized in 1858, it moved from Viroqua to Beloit, and in 1862 became the Second National Bank of Beloit. There were **no examples in the ABN archive sale** and this is a rarely seen WHW imprint on Wisconsin from the Julian Blanchard Collection. Wellstood, Hay & Whiting, New York. R-6. **EF-AU,** wrinkled, but the upper left corner is damaged, slightly into the tip. ***($1,250-2,500)***

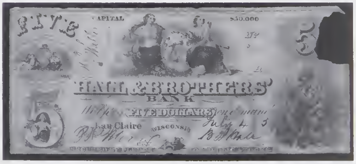
A Rare Spurious Note

1485 **WI.** *Eagle River.* Marathon County Bank. **$3.** January 15, 18_. (WI-140 S5). Red "THREE" protector. This bank opened in 1858 and closed one year later. This is a spurious issue, as the bank never had any $3 notes. This county includes Wausau, the home of the Employee Mutual Insurance Company. R-5. **VG-F,** with fold splits and edge tears. ***($200-300)***



1486 **WI.** *Eau Claire.* Hall & Brothers' Bank. **$5.** July 4, 1857. (WI-150,G8a). Red protector "5"s. Two women flank shield with arm and hammer. Justice in 5, left. A tremendous proof note on the state. Proof note collectors desire this imprint as there were none in the ABN Archives. The title is rare and a well collected one. However, this is a well vignetted coin note as well. There are well done repairs on the corners by Barrows of Richmond, but they increase the integrity of this lovely proof note. The Wisconsin proofs in the March, 2005 Schingoethe Sale saw spirited bidding, and we are sure that in the generally spirited Memphis setting this should continue. A beauty! WHHW. Very rare bank for any note in any grade. **About Fine,** in detail, but a portion of the left side is gone. 8) *Sinipee*. Mississippi Marine & Fire Insurance Co. **$2.** April 10, 1844. Chunk off the lower right negates that. **VG,** or so, but stained, and the lower right side is gone. 9) *LaCrosse Surcharge*. **$5.** August 1, 1855. (TN-5,G10). Agricultural Bank of Brownsville, TN with surcharge. Ceres. Man with sheep, right. Overstamped "LA CROSSE" and "RACINE". **About Fine,** burn marks and rough corners pieces out more of the left corners, and some stains. Great collection for fillers. This company manufactured cars with special body features. Described as "wreck-proof", they were designed specifically for rugged taxicab use. The arrangement of the doors was also unusual. At the turn of the century, John and Horace Dodge supplied engines, transmissions, and axles to automobile assemblers such as Ransom Eli Olds and Henry Ford. In 1914, John and Horace decided to manufacture their own cars. Their early models were well-received, and decades of automotive success followed. By 1925 the Dodge Brothers were dead, and their widows were ready to sell their shares in the business to outsiders. The buyer was Dillon, Read and Company, and the price was $146 million dollars, the largest cash transaction in the history of industrial finance up to that point. The importance of this example cannot be exaggerated.

In 1903 the New York franchise was approved as a member of the American League. The team was known as the "Highlanders", because the ballpark was located at 168th and Broadway, one of the highest spots in Manhattan. In 1912 pinstripes first appeared on the Highlander uniforms, creating the most famous design in sports. In April 1913 the team was officially renamed the "Yankees". On January 3, 1920, the Yankees purchased the contract of Babe Ruth from the Boston Red Sox, which helped the Yankees clinch the first of their 39 American League pennants in 1921. In 1928, the year this certificate was issued, the Yankees made numbers a permanent feature of their uniforms. This would be adopted by the rest of baseball by 1932.

Jacob Ruppert (1867-1939) was the owner of the New York Yankees from 1915-1939. He was a millionaire brewer and socialite. During his tenure as owner he was fortunate to have players like Babe Ruth, Lou Gehrig, and later, Joe DiMaggio, as well as the 1927 "Murderers Row" team.

Speaker's record of 793 double still stands today. His shallow play in center field enabled him to record 450 assists, placing him comfortably atop the all-time list. As a manager he went on to guide Cleveland to a World Championship in 1920.

The New York Yankees Football Club was part of the All-America Football Conference. The conference was a professional American football league that challenged the rival National Football League from 1946 to 1949. The league successfully competed against the National Football League in many cities, outdrawing the older league in terms of attendance and in the case of teams such as the Cleveland Browns and San Francisco 49ers, demonstrating equal if not superior talent. The Browns in 1948 became the first professional football team to go undefeated in all of its games, 24 years before the Miami Dolphins. After 4 years of operations the AAFC teams were in financial difficulties due to players' salaries. The NFL, was also having difficulties, and a merger agreement was reached. Three AAFC teams were merged into the NFL including the Cleveland Browns, the San Francisco 49ers and the Baltimore Colts. The Brooklyn Dodgers, Buffalo Bisons, Chicago Rockets, Los Angeles Dons, Miami Seahawks, and New York Yankees did not continue.

Marcus Garvey (1887-1940), was a Jamaican printer and editor who organized the Universal Negro Improvement Organization. He eventually brought this Negro nationalist movement to New York. Convinced that the Negro could not prosper in countries where they were the minority race, Garvey urged a "Back to Africa" movement, and he conceived of a steamship company trading between New York, the West Indies and Africa. Over a half million dollars in subscriptions poured in, but the enterprise never materialized. Garvey was arrested, convicted of fraud, and after two years, deported to Jamaica. Garvey raised the race-consciousness of this nation, and followers of his philosophy persist to this day. An important piece of Afro-American history.

In 1899, when this certificate was issued, Thomas Edison was thoroughly dejected, having spent five years in the highlands of Ogdensburg, New Jersey, trying to perfect a new method for processing iron ore. He decided to direct his attention towards a new venture, a company that he hoped to develop for the purpose of producing low-cost fireproof cement buildings. It was an idea that was way ahead of its time, and Edison soon moved on to his next great project, the development of a practical storage battery for automobiles.

William Fox (1879-1952) was an American motion picture executive who built an empire controlling a large portion of the exhibition, distribution, and production of film facilities during the era of silent film. In 1915 Fox Film Corporation was founded, the progenitor of the Twentieth Century-Fox studios. Fox introduced organ accompaniment to the silent films shown in his theatres, and pioneered theatre design for the comfort of patrons. He developed Theda Bara into the first screen vamp and star. He was also famous for the 1927 news series "Movietone News". On account of the expense of converting 1,100 theatres to sound equipment and the economic crisis of the 1930s, his empire crumbled. He declared bankruptcy in 1936, and in 1942 served time in prison for bribing a judge.

First we have seen. On March 26, 1895 Charles Jenkins was granted the first motion picture projector patent for his "Phantoscope". At the time, motion pictures were generally played in special viewing devices cranked by a hand motor, which allowed only a small number of people to simultaneously watch a move. Jenkin's Phantoscope used a box with a light in it to put motion pictures in plain sight, or as Jenkins put it, the "picture carrying light is projected". The Eastman Company had made big advances in film technology, and with Jenkins projector technology, motion pictures became attractions fit for big audiences, instead of curiosities for a handful of spectators.

A second bond dated 1858 for $100 from the Louisiana Tehuantepec Company is also included.

This company, as opposed to the earlier one, was chartered by the Louisiana Legislature on March 14, 1855, the corporation set up on July 30, 1857, in New Orleans. When the first project did not get off the ground, this second company was chartered for similar purposes. Note that the pay agent was James D. Denegre, president of the New Orleans Canal Bank. Many prominent people reportedly subscribed, including Judah P. Benjamin, a U.S. Senator and later a Confederate cabinet officer. But like the first firm, this one also failed, after doing very little. For some reason, the papers and bonds of this firm were captured by the Union in 1862, and now reside, for the most part, in the National Archives. We have seen or heard of only 5 of these bonds in private hands.

Philo E. Remington, president of the company and grandson of the founder of the Remington firearms and typewriter companies, organized this company to produce records. In 1920, he filed a trademark application for the Reminola brand. The company was marketed as a premium-priced label, and it offered primarily bland pop and light classical fare. Technical quality was mediocre at best, and with few stars on its roster, the company could not compete with Columbia, Victor, and other comparably priced labels.The Remington Phonograph Corporation failed in December 1921. Philo Remington attempted to reorganize as the Remington Radio Corporation in 1922, but suspended operations after being indicted for stock fraud.

The southerners, who hoped to break up Mexico and turn it into a slave holding territory, were eager to invest in this scheme. 2121 **Bear River & Auburn Water & Mining** (CA) 1851. #1538. **One share.** Impressive vignette with miners working sluices in the foreground, a mine entrance, trestle bridge and mountains dominate the rest of the certificate. "Drawn by L.W. Smith, From Nature."**VF.***

($2,000-4,000)

Auburn was a Gold Rush town founded in 1848 and located in Sutter County. Originally called North Fork Dry Diggings, the camp was later renamed Auburn after a group of miners hailing from Auburn, New York. The major problem in this district was the lack of water. While the creeks and streams which converged into the ravine provided plentiful water during the winter months, they all but dried up during the summer, forcing the miners to carry the dirt great distances to water for panning. If a miner was willing to cart the dirt, stories claim it was not unusual for him to make up to $1000 a day. As this required a substantial amount of work, it's no wonder that many miners looked for easier diggings, which resulted in the camp being sparsely occupied during the summer of 1849. But as the water returned, so did the miners. By 1850 the population of Auburn was 1200, and the town became a major trading and supply center for the region. Auburn was a leading Gold Rush town, but never gained a wild reputation and didn't suffer the violence as did many other gold camps. This is the first certificate we have seen from this company. An important Gold Rush certificate with an even more spectacular mining vignette.

In 1848 gold was discovered in California, and streams of treasure seekers came to the West from around the world. Each were convinced they were going to strike it rich - and many did. After a few years of mining, much of the gold in California had been found, forcing miners to cross over the high Sierras in search of treasure. After years of grueling work, only small amounts of ore were found on the eastern slopes of the mountains in Nevada. Even though men were pulling respectable amounts of silver from the hillsides, there were hints that a much larger ore body was nearby. After a torrential rainstorm someone decided to assay the mud, and found it to be worth an incredible $2000 a ton. Prospectors continued their search. They discovered a small vein, which at first appeared unremarkable. As the miners followed the vein deeper into the mountain, it grew wider: one foot, two feet, ten feet, twenty feet - almost as wide as the mountain itself. The silver find was named the Comstock Lode and it produced nearly $8,000,000 per month. The Comstock Lode was mined by three principal companies: Gould & Curry Silver Mining, the Ophir and the Mexican. In 1863 Gould & Curry was paying a monthly dividend of $150 per share.

2239 **Sutro Tunnel** 1868. #47. **30 shs.** Miner with pick, left. Signed by **Adolph Sutro.** Signature is pen cancelled. R43. *($750-1,250)*

By 1864 the owners of the fabulous Comstock Lode silver mines were at an impasse. The Ophir, the Gould and the Curry had yielded riches almost beyond belief, but the antiquated mining methods had employed all but killed the golden goose. The shafts and tunnels were now deep in the heart of the mountain where the owners expected to find even greater treasures. Digging came to a halt when rising water levels overwhelmed the pumps, which simply could not push water back up to the surface. At this point Adolph Sutro came to the rescue.

Adolph Sutro (1830-1898) was a Prussian Jew who came to America in 1850. Lured by the California Gold Rush, Sutro engaged in mercantile pursuits in the Stockton area. In 1860 he went to Nevada and set up a quartz-reducing mill. He conceived of the idea of driving a three-mile-long tunnel into the base of the mountain to drain and ventilate the mines from below. At first the idea was met with a great deal of skepticism, and local support was not forthcoming. Sutro turned to Europe, where mining methods were more advanced and financial backers more understanding. He secured enough funds to begin the project. In 1872, when this certificate was issued, the tunnel was still under construction. Six more years of Herculean labor was necessary to bring the project to completion. Sutro sold his interest, invested it in San Francisco real estate, and devoted the rest of his life to politics and philanthropy.

William Sharon (1821-85) was the agent of William C. Ralston's Bank of Nevada at Virginia City during the early days of the Comstock boom. Despite his connections, he lost a bid for the U.S. Senate to James Fair, and after Ralston's death, Sharon acquired many of Ralston's properties.

Waller's defeat most likely refers to the defeat of Sir William Waller during the English Civil War at the Battle of Roundway Down in 1643.

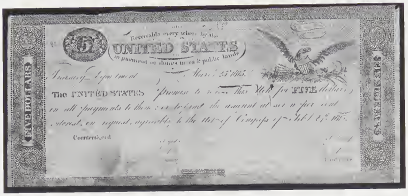
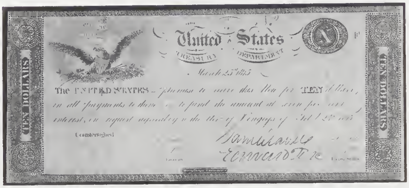
Rare Pre-1861 Federal Notes

2256 **$5. Fr.TN-15. Fine. Act of Feb. 24, 1815.** Plate C . Unsigned remainder, hammer cancelled. Some staining at the left, and a small bit at the lower right. A good opportunity to obtain one of these early types at a price that won't "break the bank." ***($4,000-6,000)***



2256A **$10. Fr.TN-14a. VF-EF. Act of Feb. 24, 1815.** Plate F. Uncancelled, partially signed remainder. Small spots of mounting adhering to the right end of the back, not visible on the face. A very nice example, technically a bit closer to VF than EF, but with the initial appearance of a Choice EF or better. With the incredible Ford collection now history appearances of these rare and popular early Federal notes will become more and more sporadic, as collectors realize how limited the census really is. ***($6,000-8,000)***



2256B **$10. Fr.TN-13a. Fine. Act of Feb. 24, 1815.** Partially signed remainder note. Part of the bottom border is trimmed off, but the note is evenly worn and undamaged. With higher grades bringing $8,000 to $12,000, this is a nice affordable example of the United States' initial currency issue. ***($4,000-6,000)***

A Brief History of the U. S. $2 Bill

Throughout history the $2 Denomination (or 2 Pounds, 2 Francs, 2 Rubles, etc.) has been accepted around the world without much fanfare, but Americans have always had a love/hate relationship with the $2 denomination. It was often considered bad luck (based in part on losses at the $2 window at race tracks), and store cash drawers had no place for it. Even leather wallets of the last century that had pre-printed partitions for various denominations generally ignored the $2 bill. It was a part of various Colonial issues, and common in countless private and state issues of Obsolete Currency, as well as Confederate Currency, indicating both an early need for it and an acceptance of it, yet in authorizing America's first national currency in 1812 Congress ignored the denomination, and it stayed curiously ignored up until the Civil War.

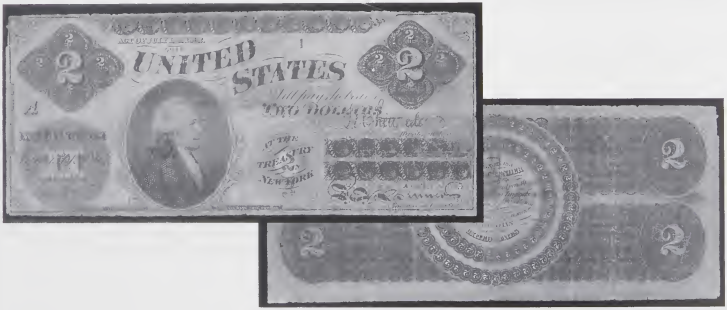
With the first issue of Legal Tender Notes in 1862, the denomination was revived (a planned issue of 43 notes to go with it was cancelled). Though seldom encountered in circulation these days, the denomination has endured ever since, and is one of the two denominations for which the Treasury currently sells specially prepared slip-cased sets.

Choosing to honor important individuals on the new currency, Congress selected Alexander Hamilton for the $2 note. Hamilton was a man of strong convictions who had powerful opponents to both his political and financial policies. Yet Hamilton prevailed, becoming the first Secretary of the Treasury for the fledgling country. He was an early staunch supporter of the Bank of the United States, and architect of the fiscal model on which our nation is based. As Hamilton was perhaps the greatest financial genius of his time, honoring him in some way was a foregone conclusion. Fittingly, Hamilton is today buried in the south part of Trinity Churchyard at the foot of New York's Wall Street, the heart of world finance.

In the past few years the $2 bill has enjoyed somewhat of a renaissance, and is at the height of its popularity with collectors.

Smythe is proud to have been selected to offer to the public for the first time what we consider to be the single most historical and numismatically significant item to be sold in generations.

THE FIRST U.S. $2 NOTE EVER ISSUED



2268 **$2. Fr.41a.** 1862. No 1. Series 1, Plate Position A. **Very Good. The top note from the first sheet of $2 bills ever printed for any series of U.S. Currency.**

Serial Number 1 notes have never been more popular than they are today, with a number of them selling in the upper five figure range, and one or two being offered in six figures. All, however, have had one thing in common – they are simply the first of a type, the first of a particular series, or perhaps the first of a signature combination. **This is the first time in history that the very first note of an entire denomination has been publicly offered.**

This historic note is one of only two known that are indisputably the first of their denomination. Lower denominations were issued in the War of 1812 Series (which did not include the $2 denomination), and as they were nearly 100% redeemed, it would be a miracle for any Number 1 notes to have survived. In fact, there are no issued notes known for any pre-1861 Federal issue other than one $3 note and one $100 note. The higher denominations, which were first issued after 1861, are all excessively rare or non-existent due to the fact that few people could afford to have years of wages tied up in one non-interest bearing note.

This brings us to the $1 denomination. Like the $2, it was first issued in 1862, and was of a low enough denomination to be saved. The first $1 bill ever issued is in fact known, and was a presentation piece that is now owned by the Chase Manhattan Bank, formerly part of their Paper Money Museum. Unlike the $1, the first $2 was unceremoniously released into circulation. The $1 will most likely never be sold, leaving the $2 as the only true Number 1 of a denomination obtainable.

Given that this is that first note ever issued of its denomination and that no other note available in any denomination can boast such distinction, its historic and numismatic importance are inestimable. As such, we have woefully little basis on which to form an opinion of its value. The records of other Number 1 ranges can serve only as a starting point, as the significance of those notes pales by comparison. A bid reasonably well into the six figures will be necessary to secure this true museum piece. ***($250,000-$500,000)***

The History of the Note

This note has had only three owners in the past century. The earliest owner of record is Abe Hepner, who joined the A.N.A in 1900, and was Member #187. Hepner owned the note for nearly half a century before selling it in the 1950's. The purchaser at that time later exhibited it at the 1971 and 1972 A.N.A Conventions and the 1973 G.E.N.A Convention, and it was written up by Walter Breen as the First U.S. $2 bill. Our consignor quietly obtained the note from that exhibitor, and has owned it for the past few decades.

Another Pretender to the Title

A few years ago another Serial Number 1 $2 note was offered as "Possibly" the first $2 Bill. The thorough analysis in Martin Gengerke's United States Paper Money Records debunked the claim, and the note has since been auctioned twice for what it really is – a true Serial Number removed from the right side of the note.

Technical Analysis

Research on the early issues of the United States has been difficult due to the fact that Treasury and Bank Note Company records are widely scattered; some are in government hands, some are owned by the current descendants of the early bank note companies, some are in private hands, and some are missing. In spite of this, diligent research, much not yet published, by Douglas D. Murray, author of The Comprehensive Catalog of United States Large Size Star Notes, Martin Gengerke, author of United States Paper Money Records, and Gene Hessler, author of the Comprehensive Catalog of U.S. Paper Money and countless articles, all support and converge on one fact - this is without doubt The First $2 Bill Printed by the United States of America.

As no pre-1861 Federal emission included the $2 denomination, the first $2 bills were produced in July 1862 for the Legal Tender Series. For security reasons, responsibility for the production of plates and notes for the various denominations were divided between the American Bank Note Company and National Bank Note, separated at the National Currency Bureau, the forerunner of the Bureau of Engraving and Printing.

The serial numbering mechanism employed by both bank note companies had only five digits, so it was necessary to print the notes in "series". Each series of 100,000 notes began with Number 1 and ran to 99999, with Serial Number 100000 being set by hand. All denominations (except the $1) produced by the American Bank Note Company began with notes bearing no series number (i.e. the well known and very rare Fr.61), and continued with Series 2,3, etc. All denominations (including the $2 but not the $100) produced by the National Bank Note Company began with Series 1, continuing with Series 2,3, etc. As 17,030,000 $2 notes were produced, the last note was Serial Number 30000 in Series 171. It is estimated from the Gengerke census of existing notes that Fr.41a ran from Series 1 Number 1 through Series 88 Number 10000, whereupon Fr.41 commenced with Series 88 Number 10001, and continued through to the end of the issue. Offered here is a Fr.41a, with Serial Number 1 and "Series 1", as required by the above facts.

Doug Murray has graciously given us a tantalizing bit of his unpublished research. Unknown until now is the fact that two different Treasury Seals were used on 1862 Legal Tender Notes. The original seal, with a nearly solid background, was used for only a short time before being redesigned just days or weeks into the $2 issue. Only five of these original seals are known on a $2 note, all naturally in "Series 1." And all notes within the first 10,000 printed have the correct original seal, not the redesigned seal.

Thus the Fr.41a series 1 Serial Number 1 being offered meets all known tests to unequivocally qualify it as the very first $2 bill:

-It has the proper National Bank Note Company and American Bank Note Company credit logos.

-It is from "Series 1" and has the proper style "1" as used by the National Bank Note Company.

-It has the original "filled-in background" Treasury Seal, which was modified long before the first series was completed.

-It is lacking a faceplate number, as is true of all notes observed in Series 1 and Series 2, (reason unknown). Accompanying this note are letters from Gene Hessler, Douglas D. Murray and Martin Gengerke, all authenticating this note as the first U.S. $2 bill.

In summary, we feel this is not only the most exciting note we have offered in our 200+ auctions, but is without doubt the most important note made available to collectors in several generations. It is justly deserving of a prominent niche in the finest museum, and if indeed it is acquired by a museum it may never again be available.

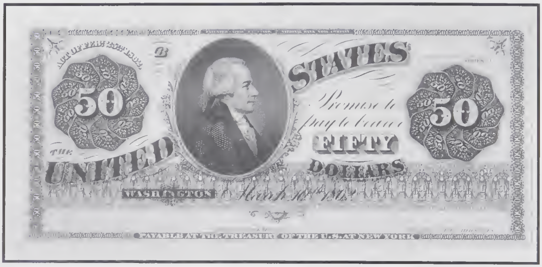
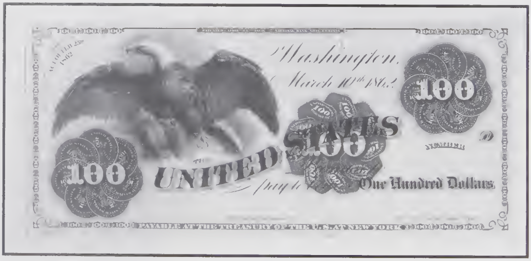
Four Beautiful and Rare Federal Proofs



2286 **$50. Fr.148. National Bank Note Company Proof of the face of the $50 Legal Tender issued under the Act of Feb. 25, 1862.** On India paper, mounted on a card, which is affixed to an album page. Plate Position B, Plate 1, Series 1. **Choice Uncirculated.** A beautiful proof from the recently discovered **National Bank Note Company book** This design is extremely difficult to find in issued form, and the majority of those seen are counterfeit. The most common counterfeit seen is unfortunately one of the best counterfeits produced in the entire early history of U.S. paper money. This superb proof is invaluable for definitively determining the authenticity of these notes. We can find no recent records of sale to guide the bidder, but relying on recent records of similar proofs, a bid in the range of high four figures to low five figures seems to be called for. ***($7,500-12,500)***



2287 **$100. Fr.165. National Bank Note Company Proof of the face of the $100 Legal Tender issued under the Act of Feb. 25, 1862.** Hessler 1120 FD. Plate D, but no plate number or series designation. Possibly a progress proof, as there are also traces of very fine lines and pinpoint punchmarks used by engravers to align the designs. On India paper, mounted on a card, which is affixed to an album page. Seven small (4mm) circular cancellation holes, but the paper actually remains in six of them. There is also a curious small (2mm x 8mm) rectangular cut out at the right side. **Choice Uncirculated** but for very small areas of light foxing, mostly hidden in the engraving. Equally as rare as the $50 above, and, like the $50, we can find no recent records of sale. ***($7,500-12,500)***

Small cancellation holes at the signature blocks. **Choice Uncirculated** but for the tiniest glue signs at the edges, barely noticeable. *From B. Max Mehl's sale of the **Albert A. Grinnell Collection**, June 15, 1943, lot 1617. Mehl was initially given the collection to sell but evidently the results were not as expected, for the rest of the collection was sold by New Yorker Barney Bluestone in his famous 7-part sale commencing a year later. Whether the War or the general economy played a part we don't know, but even that legendary sale was insufficient to disburse the collection; an eighth Bluestone sale was necessary to sell the returns and no-sales from the first seven parts, and even into the 1950s Federal Brand Enterprises was engaged to sell remaining unsold parts of the collection at fixed prices.*

United States Paper Money Records ***Book or CD....$125.00***
By Martin Gengerke
2001. 275pp, spiral bound.

Before you buy a single piece of Federal Paper Money, there are several things you really need to know. How many times has a particular note appeared in auction or sales or in dealer price lists? How was a specific note graded in its previous appearances? What is the 50-year price history and provenance of that note? In United States Paper Money Records Gengerke, one of America's leading experts on Federal Currency has compiled and unprecedented data base of facts and figures that every major dealer or collector should have in their own library. There are over 10,000 auction or price list appearances recorded; each note listed is identified by Friedberg number and serial number and Gengerke gives "summary" grades when more than one grade has been recorded for a single note. This priceless work is also available on CD-ROM, and lists over 76,000 notes, in database, spreadsheet, and text formats, for IBM compatible computers.

2) Nos. M5 to M8. **This sheet.** From the **Herman Halpern** Collection sold by Stack's March 17, 1993, lot 239 at $5,750; CAA's Jan. 10, 2002 sale of the **Hank Scheuerman** Collection, lot 2474 at $13,225.

GOLD CERTIFICATE

2367 **$500. Fr.1215a.** 1882. No.a7880. From our Memphis 2000 sale, described as: **"$500. Fr. 1215a. 1882. Small Brown Seal. Bruce and Gilfillan. No. A7880. The Only example of the earliest 1882 $500 Gold Certificate Known to exist. This Unique Discovery piece recently came to light in a small Midwest estate, and was found among a group of unrelated documents.**

None of the leading paper money collectors in numismatic history - Grinnell, Limpert, Levitan, Donlon, Halpern, Bebee, Schermerhorn, Bass, or even the Legendary Amon G. Carter, Jr. had an example of this Previous Unknown Variety, nor any variety of the early brown seal type. They all had to settle for the later series of Small Red Seal $500 Gold Notes. More importantly, even the staggering holdings of the Federal Government, using Colonel E.H.R. Green's incomparable collection (redeemed at face to pay estate taxes in the 1940's!) as a foundation, lacks this variety. There are no $500 Brown Seal Gold Notes in the Smithsonian Institution, and the sole Brown Seal owned by the government is a Bruce-Wyman now in the extensive collection of the Federal Reserve Bank of San Francisco. The Federal Reserve system, with its limitless resources, has continually added additional redeemed notes to their collection for decades, but in all that time not one Large Size $500 Brown Seal Gold Note has ever surfaced.

While the early seal varieties (Small Brown, and Large Red) in the other Gold Note denominations have been available to collectors from time to time, all are very rare and they have always been highly prized. In the $500 denomination only two pre-Small Red Seal varieties have eve been seen. One Small Brown Seal bearing the signatures of Bruce and Wyman (Fr.1215c) is known, and one Large Red Seal signed Rosecrans and Hyatt (Fr.1215d) is known. Both are in the permanent collection of the Federal Reserve Bank of San Francisco.

The Fr.1215a in this sale is therefore the only early seal $500 gold available to the collecting public.

What accounts for the uniqueness of this note? Very few were issued. The total Printage for the Small Brown Seal notes amounted to only 9% of all $500 Gold notes issued, and were issued in the 1880's when $500 was more than a year's income for the average person. Few, indeed, at the time could afford to tie up a year's wages in the small piece of paper, and the legendary wealthy collectors mention above were not yet on the scene to preserve them!

This remarkable Gold Note has the overall appearance of a Very Good to Fine example. Some professional restoration has been done, detectable only under close inspection. The brilliance of the gold ink has faded with time, more so on the back, which shows traces of soil where the outside panel of the folded note was continuously exposed to the wear and tear of honest circulation. Estimating the value of such a note is difficult at best. There are no past auction records to refer to, and no private sales have ever been reported. Only one collector can leave the auction room with this Friedberg 1215a, and if the winning bidder is an institution, this may well prove to be the only opportunity to ever acquire this key to the entire Large Size Gold Certificate Series."

It bought $130,000 plus the buyer's charge at that sale. In the five years since then collectors have developed a much greater awareness of and desire for true rarity, and we expect the price realized tonight will reflect the fact.

2376 **50 Cents. Fr. 1311.** Perf. edges, no monogram. **Choice AU.** A beautiful example of this rare note. Not perfectly centered, but bright, with full perforations all around, and just one faint fold near the left edge.Very scarce in the lower grades, but **rare** in high grade. *($400-600)*

2377 **First Issue Denomination Set.5, 10, 25 and 50 Cents. Fr.1230, 1242, 1281, 1312.** AU and Uncirculated (3). The 25 and 50 Cents are close to choice. [4] *($200-300)*

2378 **First Issue Denomination Set.5, 10, 25, and 50 Cents. Fr.1228, 1242, 1281, 1312.** Uncirculated (2), and AU (2). All are off center, and trimmed into the design on one side. The 5 Cent has full perforations all around. [4] *($175-250)*

2379 **First and Second Issue Selection.5 Cents through 50 Cents.** Fr.1230 (2), 1242, 1281, 1312, 1232, 1233, 1244, 1285. VG through AU, average VF. [9] *($125-175)*

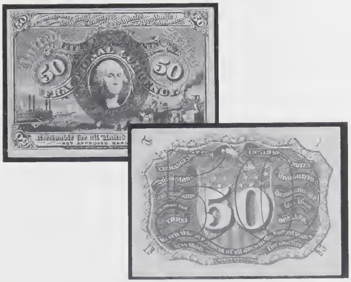
2380 1) **5 Cents. Fr. 1232. Choice Uncirculated.** 2) **25 Cents.** 1283. **Choice Uncirculated.** 3) **50 Cents. Fr. 1318.** 1-18-63. **Uncirculated.** Tightly trimmed, but bright [3] *($175-250)*

2381 **10 Cents. Fr. 1247.** 1-18-63. **Choice Uncirculated.** Virtually gem, with full margins all around, and clear surcharges. The top edge of the back shows some pressbed smudging, but this is still one of the nicest of this very scarce variety that we've seen in a long time. *($300-400)*

2382 **10 Cents. Fr. 1247.** 1-18-63. **Choice Uncirculated.** A second example of this rare variety. This one lacks the margins of the last, and is tight at the bottom. However, it has nice sharp surcharges, and a cleaner appearance, with no pressbed smudging. *($250-350)*

2383 1) **25 Cents. Fr. 1284.** 18-63. 2) **25 Cents. Fr. 1301.** Trimmed in at the bottom. Both **Choice AU,** the first very scarce. [2] *($75-125)*

2384 **25 Cents. Fr. 1288.** 2-18-63. **Choice Uncirculated.** Close at the top, with a particularly broad bottom margin. A very scarce and underated variety, rarely available in high grade. *($75-100)*



2385 **50 Cents. Fr. 1322.** Fibre paper, T-1-18-63. **Choice Uncirculated.** An exceptional fibre paper note. The back is well centered, with sharp clear surcharges and traces of embossing (almost unknown on fibre paper notes); the face is just a bit close at the top. A bit better than the O'Mara note, and one of the nicest we have seen. *($450-700)*

2386 Second Issue Denomination Set 1) **5 Cents. Fr. 1283. Choice Uncirculated.** 2) **10 Cents. Fr. 1244. Choice Uncirculated.** Gem but for the close bottom margin. 3) **25 Cents. Fr. 1283. Choice Uncirculated.** The face is perfect, the back off center. 4) **50 Cents. Fr. 1318.** 1-18-63. **Choice Uncirculated.** Trimmed just slightly into the design at the bottomn [4] *($300-450)*

2387 3 Cent Pair 1) **3 Cents. Fr. 1226.** Light Curtain. **EF-AU.** A bit close at the bottom. 2) **3 Cents. Fr. 1227.** Dark Curtain. **Choice Uncirculated.** The margins are a bit close here and there, but never touch the engraving. Scarce. [2] *($125-175)*

2388 1) **3 Cents. Fr. 1226**. Light curtain. **Choice Uncirculated.** The margins are rather close, but the note is otherwise gem 2) **5 Cents. Fr. 1238.** Green back. **Choice Uncirculated.** A gem if the right margin were just a bit better. [2] *($100-150)*

2389 1) **5 Cents. Fr. 1236.** Red Back. 2-3) **5 Cents. Fr. 1238.** Green Back. All are **Choice Uncirculated,** gem but for the centering. The margin dips a bit into the engraving on one of the 1238s. [3] *($200-300)*

2390 **5 Cents. Fr. 1237.** Red back. **Gem Uncirculated.** Bright and crisp, with full embossing, and virtually none of the offset smudging that plagues this issue. Overall one of the nicest we've seen in years. *($300-400)*

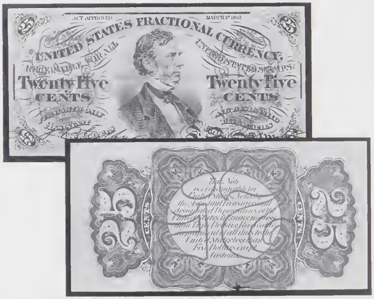
2391 **10 Cents. Fr. 1251.** Red Back. **Gem Uncirculated.** Not absolutely perfectly centered, but the edge is not close to the engraving anywhere. The bright freshness and originality of this piece, with full color and sharp embossing, more than offset the centering. *($250-350)*

2392 1) **10 Cents. Fr. 1253.** Autographed signatures of Colby and Spinner. **Choice Uncirculated.** Very close to gem, with the surcharge on the back a bit dark. 2) **10 Cents. Fr. 1255.** Green back. **Choice Uncirculated.** Again, close to gem. [2] *($150-225)*

2393 **25 Cents. Fr. 1291.** Red back. **Gem Uncirculated.** Fully bright and crisp, with superb sharp original embossing. *($250-350)*

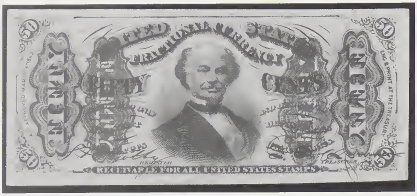
2394 1) **25 Cents. Fr. 1292.** Red back, 'a'. **Choice AU.** 2) **25 Cents. Fr. 1295.** Green back, 'a'. **Choice Uncirculated.** Sharp, deep embossing and good color, but very tight at the right and bottom. [2] *($100-150)*

Rare Inverted Surcharge



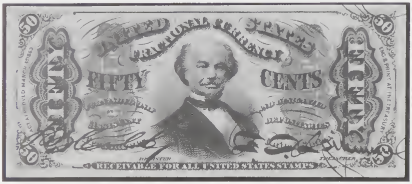
2395 **25 Cents. Fr. 1294.** Green back. **EF.** A bright, crisp note, with sharp original embossing. Good margins on the face, but the back is low. **The large "25" surcharge on the back is inverted.** A rare and attractive major error *($400-600)*

2396 **25 Cents. Fr. 1295.** Green back, 'a'. **EF-AU.** A white **gutter fold** runs vertically near the right end. A common error on today's Small Size currency, but quite rare on Fractional Currency. *($100-150)*



2397 **50 Cents. Fr. 1324.** Red Back, A-2-6-5. **Gem Uncirculated.** Great color, with good embossing. *($550-750)*

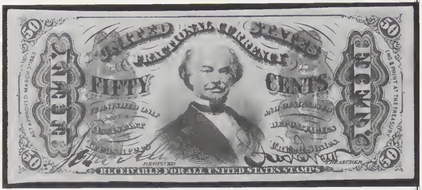
2398 **50 Cents. Fr. 1324.** Red back, A-2-6-5. **Choice Uncirculated.** Virtually gem. The right margin has a bit of red pressbed smudging, and there is a tiny paper flaw at the top right. *($200-300)*



2399 **50 Cents. Fr. 1328.** Autographed signatures of Colby and Spinner, A-2-6-5. **Gem Uncirculated.** The paper, ink, and surcharges are all fully bright, and the thin bit of pressbed smudging at the edge of the wide left margin serves to emphasize that this note came from the edge of the sheet. *($375-550)*

2400 **50 Cents. Fr. 1328.** Autographed signatures of Colby and Spinner. **Gem Uncirculated.** Another superb example, with bold dark signatures that haven't eroded the paper. *($375-550)*

Rare Allison & New 50 Cent



2401 **50 Cents. Fr. 1330.** Autographed signatures of Allison and New, A-2-6-5. **Gem Uncirculated.** Nice dark signatures that have not eroded the paper. Both the paper and ink are as bright as can be, and the embossing is good. Clearly superior to the "Gem" Liechty/O'Mara note, as well as several other "name" pieces. The **Allison & New** note was for many decades considered the **"King" of the series,** until collectors realized that the 1351 to 1354 notes were actually rarer due to the combination of plate position and surcharge. While those notes command higher prices, the Allison and New is still more instantly recognizable as a key to the series, particularly by "old-timers." Published population estimates of 20 to 30 pieces are a bit exaggerated. The late F.C.C. Boyd compiled a list of about 40 pieces, which hasn't been challenged by leading specialists since then. Most of them are Uncirculated, since they were signed by later Treasury officials long after the Spinner notes were issued, and were no doubt meant to be saved as souvenirs. Few, however, have remained this nice over the past 130 or so years. *($6,000-9,000)*

2413 **15 Cents. Fr. 1267.** Watermarked paper. **Uncirculated,** trimmed into the design on two sides, and **EF,** trimmed in at the top, with a short edge split. [2] *($125-175)*

ADHESIVE PAPER

DOLLAR PACKAGE CONTAINS

NEAT, DURABLE, AND

2447 **Possibly the Earliest Reference to Paper Money Restoration!** *"National Bank Bill and Currency ADHESIVE PAPER."* A package of what appears to be sheets of gummed glacine paper intended to be used to repair damaged paper money, sheet music, etc. Prepared by A.S. Knight & Co., successors to A.I. Woodbury & Co., Boston Mass. Some sheets have been used, those that remain are curled at the edges aged, and adhering together. With a cover sheet the size of a Large Size note, stating "***The best thing ever invented for repairing Bank Bills, Currency...***" Banknote restoration is obviously not a new phenomenon, and while such work may not be the world's oldest profession, this package certainly pushes it back many decades. Undated, but from the appearance we'd guess around 1890-1910. *($300-500)*

Atmospheric conditions over the years have obviously played havoc with this paper, and we warn the buyer that it is probably no longer of much use. We can only hope that conditions are more hospitable in its new home in Forest Hills, Flemington, or wherever.

Edgar Hoover, Director*". We've seen a few of the large broadsides listing the serial numbers on occasion, but we've never seen the list in this format before. Slight scuffing at the corners, but pretty good shape considering its age and obvious use. *($300-600)*

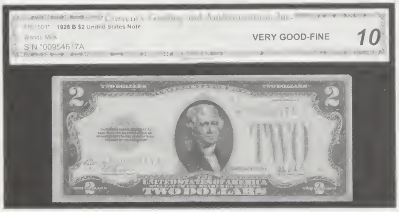
Rare One of Six Known 1928B Star



2478 **$2. LT. 1928B. STAR** No.*00954617A. Excluding just a handful of Mule and late finished plate varieties, this is by far the rarest small size regular issue Star block known. Outstanding Low Number Matched District STAR Set

2537 $2 2003 FRN 12 district matched STAR Premium set #00000006. Includes BEP presentation book and slip cover. Gem Uncirculated.

This low number matched star set could have been yours if you were one of the lucky ones to get their order into the BEP in the first hour or two of the announced sale. The entire run of 8000 sets was sold out in five days. No surprise considering the lack of low number notes in the $2 denomination and the growing popularity of collecting low numbers. We have seen single digit individual notes being offered in the $3000 to $4000 range with one #8 set being offered at $36,000.

A quick glance through the Oakes Schwartz catalog will point out the rarity of low number $2 stars in an instant. In fact there are only 3 series; 1928, 1953 and 1963, that issued low number stars in the legal tender series. The other series ran in consecutive order from the previous series and did not reset to number one. The 1976 FRN series did issue stars starting with serial number one on all series but they are rarely if ever offered. Three digit 1976 stars are bringing $300 and much more depending on who is doing the selling.

The 1995 $2 FRN was issued in the F* starting with number one but you may recall the other big hit at the BEP, the Millennium set, started the serial number with 20000001* effectively negating a true serial number one issue for all other districts. A matched serial #5 $5 premium set recently sold for $16,100 in auction and they were not star notes. You are unlikely to find one single digit #6 $2 Star note in years of searching we offer you the only opportunity you may have to win this lot of all twelve districts with matching serial number. All things considered this set should sell in the range of $25,000-35,000.

Small Size Definitions and Terminology

BEP = Bureau of Engraving and Printing.

Bp = Black plate or Back check. The small number engraved into the lower right field used by the BEP as a control or reference number for tracking plate use and inventory.

Block = The prefix and suffix letter or star combination at the beginning and end of a serial number.

COP = Changeover Pair. Also called cross-over pairs, which are consecutive notes of two different series, typically the earlier series comes before the latter. When the latter series precedes the earlier series it is referred to as Reverse Changeover Pair.

Experimental = Notes which were produced on special paper to test wear and durability in circulation. Designated by special blocks, and in one case with a red letter surcharge on the face of the note.

Fp = Face plate or Face check. The small number engraved into the lower right face field used by the BEP as a control or reference number.

Funnyback = A slang collector term used to describe the 1928 through 1934 series of one dollar Silver Certificates. Coined because of the "Monopoly" or play money look to the reverse design.

The David Schlingman Collection of Small Size Currency

My introduction into the world of small size currency came in the early 1960's. I was employed at the local airport as a charter pilot flight instructor, and one summer day two young boys arrived for the popular "fifteen minute airplane ride for five dollars". The boys had gotten into the family cookie jar and had acquired the five dollars for the ride. Two of the bills happened to be 1928 $1 S.C. "Funnybacks". I had never seen these and was curious about them. This started me down the long trail of study, collecting, and enjoyment of small size currency. My first insight into this fabulous world was the Standard Hand Book of Modern U.S. Paper Money by Chuck O'Donnell. My search and study continued into Small Size Legals, North Africa and Hawaii notes.

I continued looking for years at early small size currency. Many times I found items that did not fit into the census, and off would go another letter to Chuck. I had the enjoyment of many fine letters from Chuck over the years until his death, and a tremendous amount of knowledge came from him.

As the years became decades, my knowledge and collection swelled in size. My long time search for so many answers to the many mysteries spilled over to John Schwartz, Peter Huntoon, Jim Hodgson, and of course, Scott Lindquist of Smythe.

One great event for me lasted an entire year. This period was June '67 –June '68, the year of the Great Silver Certificate Redemption. I was now employed as a pilot with Transworld Airlines flying out of Kansas City. I met a coin dealer who operated a large collection center for silver certificate redemption. His point of sale was a photo supply house in Philadelphia. We struck up a deal where I would hand carry the certificates to Philadelphia on my regular TWA trips (this saved him shipping and insurance) and in return I was allowed to look through all of the certificates and pull which ones I wanted. The bulk of my collection in today's auction is a result of that year of search. Nobody ever knew what was in the many bags or cardboard boxes that I was seen carrying during all those many trips between Kansas City and Philadelphia.

When the redemption period ended, I had searched more than one million pieces (not dollars) of currency. This when I really learned the meaning of the phrase "The Joy of the Hunt". I love it to this day.

I will still hunt and my collecting days are not over. If I live long enough another Dave Schlingman Auction may come creeping out.

This original VF has a couple of unobtrusive rust spots that should not detract from the value of this rarity. 2664 **$2. LT. 1928D.** No.B98122371A. Previously listed as AU, this Ex. Thompson Collection note is closer to EF, and tied for the finest known. At least as rare as the 1928C Mules, this note is not known in grades above EF, although some, as this note, have been catalogued as AU or EF-AU. 2714 **$5. LT. 1928C / 1928C Mule.** No.F00703140A/F00703141A. A one of a kind COP with no others recorded in Oakes/Schwartz. It is anyone's guess what the FA Mule would sell for by itself in this lofty grade, and amazing that it survived at all, considering the difficulties in finding even a Fine note. Yet, Dave Schlingman was able to locate this note in a COP, no less. After being lightly circulated, the notes were spared certain destruction in the streets of commerce, making it even more likely that no others survived. Buy this lot for the high grade Mule or buy it for your COP collection; either way bid strong, as you may never see another. **AU.** [2] *($3,000-5,000)*

2715 **$5. LT. 1928C. Mule** No.G41283312A. A pressed VF just sold for $1850, and an EF sold 2 years ago for $3680. This GA Mule note, found only with back plate 637, is the lowest known GA and one of only five recorded to this point. A pleasing circulated note that is undervalued by all the experts in this collecting field. **Choice Fine.** *($1,000-1,500)*

2716 **$5. LT. 1928C. STAR Mule** No.*05012128A. Pinhole, tight bottom margin. The third scarcest Star in the series, behind only the 1928F Wide II and the 1928B Mule in rarity. There are only 15 recorded in the most reliable census, and Dave Schlingman had 4 of those. A pleasing, evenly circulated Mule Star. **F-VF.** *($500-800)*

2717 **$5. LT. 1928C. STAR Mule** No.*04928514A. We have seen only 6 offerings of this scarce Mule Star in the last seven years, and most have been Fine to Very Fine. Based on past prices realized and the fact that this is the low observed listed in Oakes/Schwartz, this note should realize a hefty sum. **VF.** *($800-1,100)*

2718 **$5. LT. 1928C. STAR Mule** No.*05192704A. We have recorded only one sale of an EF in the last seven years, and in 2002 that note realized $1600. This note leans more towards an EF, but has one too many folds to warrant a full EF grade. **Choice VF-EF.** *($1,000-1,500)*

2719 **$5. LT. 1928C. STAR Mule** No.*05101511A. This last 1928C Star Mule is the third finest we have seen or recorded being sold. All 1935 Mules are scarce, but this is the king, with only three known in all grades. The high semi fancy serial number is testament to the fact that this note had a very low issue probability. The Williams and Taylor Collections did not offer an opportunity to bid on the rarity, and we can find only one past offering in a group lot of Ex. Thompson notes. **VF.** *($600-1,200)*

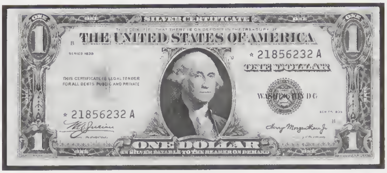
2791 **$1. SC. 1935.** 2 better Mules, a QA in pressed **EF-AU,** and a **CCU** RA with tight left margin and having the high observed serial number. [2] *($300-500)*

2792 **$1. SC. 1935.** A final group of Mules: 2 NA, 1 **VF,** 1 **VG;** PA **AU;** and 2 RA Mules, one **Choice VF,** the other **CCU.** [5] *($350-500)*

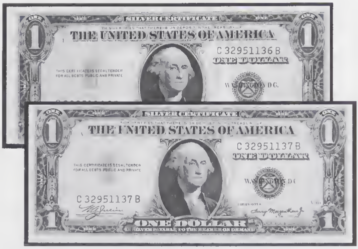
Rare 1935 Mule Star



2793 **$1. SC. 1935. STAR Mule** No.*21856232A. This is the first we have ever had the pleasure of selling, and one block that is missing from 99% of all block collections. This is not surprising, considering only approximately 8 to 10 are known. We have seen two in auctions over the last 2 years, both Choice to Gem and selling for $6050 last May and more recently for $5175. We know of only 3 to 4 circulated notes, and one other Choice AU that was sold privately. This is one of the circulated notes known, and the only example in this more affordable mid grade range. An attractive VF we call Choice, as embossing is still strong and the colors undisturbed by any fading or soiling. **Choice VF.** *($1,200-2,000)*

2794 **$1. SC. 1935A.** All of the first blocks listed show the same block as Hawaii, North Africa or R&S experimental issues, but fall after or before the WWII and experimental runs: 2 consecutive YB, 1-ZB, 1-AC, 4 consecutive FC and 1-RC. Between Hawaii and R&S runs are 3 consecutive SC block. The CC blocks, 7 notes, and BC blocks, 5 notes, fall between runs of North Africa issues. There are 2 consecutive pairs and more singles of the BC's and 2 and 4 note consecutive runs with one single of the CC block. There are 5 **Choice AU** notes with the remainder being **Choice to Gem.** An interesting group for the block specialist. [24] *($400-800)*

2795 **$1. SC. 1935A.** Another interesting in-between group similar to the last, containing: 2 YB, 1 ZB, 1 AC, 5 BC, 8 CC, 7 FC, 1 RC and 3 SC. Many are consecutive. 9 **Choice AU** and the balance **Choice to Gem.** Only the BC, CC and 2 SC blocks fall between the special runs; all the others are either before or after the runs. [28] *($400-800)*



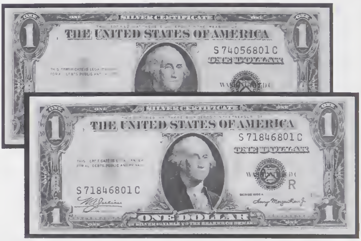
2796 **$1. SC. 1935A Non-Mule/Mule.** C32951136B / C32951137B. The only one of this rare block COP ever discovered. **CCU.** [2] ***($500-1,000)***

2797 **$1. SC. 1935A STARS.** 1 **Choice AU**, 1 **CCU** with corner tip stain, and 2 **Gems.** All these Stars fall between runs of Hawaii and North Africa Stars. A worthy lot for a specialist, as it would be a shame to have them go into hands less interested. [4] ***($300-500)***

2798 **$1. SC. 1935A.** Two consecutive rare NA blocks (N99827777A, N99827776A) **Choice AU;** 3 **Gem** last block DD; three consecutive **Choice to Gem** *A, and a **CCU,** scarce *B block. All the rarest blocks and Stars are contained in this group, missing only the incredibly rare MA. [9] ***($800-1,200)***

2799 **$1. SC. 1935A.** Another scarce block group of 16 notes: 3 NA **VF-EF;** pair of consecutive **Gem** PA: **EF** QA; 4 RA, 1 **AU**, 3 **CCU;CCU** VA, **Gem** CD consecutive pair; 1 **Gem** DD; a *A in **Gem;** and a *B in **EF-AU.** [16] ***($500-800)***

2800 **$1. SC. 1935A.** 2 consecutive NA **VF** and **EF;** PA **CCU;** QA **Gem;** RA 4 consecutive **Gems** and 1 **AU;** XA 4 consecutive **Choice AU;** CD Choice AU with fancy No. and possibly a B.E.P. marker lower right; DD in **Gem;** *A **AU;** and *B **VF.** [17] ***($400-600)***



2801 **"R & S" Experimental $1. SC. 1935A. 3 Piece Set.**S74056801C, S72780423C, S71846801C. The three notes are all well matched for grade and are very **Choice to Gem CU.** Dave searched for years to put this last 4 digit matched pair of R&S notes together as detailed in the February 2003 *Bank Note Reporter* article on page 13. The only pair known with this many matching digits. Also included is an in-between run SC block of the regular issue 1935A. Pete Huntoon found these, and they were very popular until they were all dispersed. [3] ***($1,000-1,500)***

2802 **$1. SC. 1935A Experimental "R" Notes.** A pristine consecutive pair: S71288866-67C. **Choice to Gem.** [2] ***($700-1,000)***

2803 **$1. SC. 1935A Experimental "S" Note.** No.S74221623C. With better margins than the majority we see. **Gem Uncirculated.** ***($300-600)***

2804 **$1. SC. 1935A Experimental "S" Notes.** Red "S" pair: 1 **Choice to Gem,** one **CU** that would be Gem but for toned paper. [2] ***($600-900)***

Experimental “S” Star

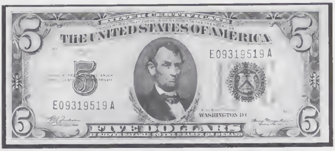
Did You Know?

Mule = When one plate is paired with another plate of two different series designations.

For instance, when a 1935 face plate is paired with a 1935A back plate. Easily determined by comparing the face and back plate number sizes.

If a micro (.06mm high) plate number is paired with a macro (1mm high) plate number in any face to back combination you have a mule.

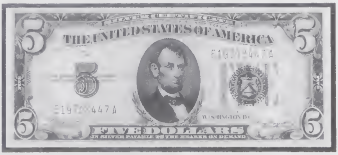


2844 **$5. SC. 1934.** No.E09319519A. The elusive EA block. The Williams sale did not have one, and the Taylor example, catalogued as EF, was in a group lot. We have not had one to offer in the last three Memphis sales, and have not seen recent offerings of specimens in auction of this quality. Well centered with two light bends and full punch through embossing. Listed at $1200 in Oakes/Schwartz 5th Edition in CU grade. **AU.** *($500-1,000)*

2845 **$5. SC. 1934.** No.E09319520-21A. A consecutive pair that is consecutive to the previous lot and nearly identical, with all the attributes previously described. Scarce. **AU.** [2] *($1,000-2,000)*

2846 **$5. SC. 1934.** No.E11687607A. Another scarce EA block in AU. Centering is a bit low, but fully embossed and original. From a different run. Choose from these four examples that Dave spent decades assembling. **AU.** *($500-800)*

Rare EA Mule



2847 **$5. SC. 1934. Mule** No.E19798447A. Only lightly handled. No definite folds. Again there was no example offered in the Williams and Taylor Collections. Note #8449 sold for $1045, which seems about right with a catalog value of $1500 in CU. With so few records it is difficult to estimate where the bidding will stop. **Choice AU.** *($900-1,100)*

2848 **$5. SC. 1934.** 5 AA blocks **Choice to Gem** with one consecutive pair; 3 BA blocks, 1 **Gem** and a consecutive pair **Choice AU** and **Choice CU**. [8] *($250-400)*

2849 **$5. SC. 1934.** Two interesting short runs, first the BA block with serial numbers B95139999 and 40000 in **Choice VF to EF.** The second group is the CA block, 4 consecutive with back plate #636, the plate just before the famed Mule 637 late finished plate, all in **CCU.** The 1934 series is one of the more difficult to find after the 1934B and the 1934D Narrows and Wide II varieties. [6] *($250-500)*

2850 **$5. SC. 1934. STAR Nos.***03954635A and *00167424A. One is a lightly pressed **EF,** the other **AU.** Both are very attractive for the grade and more affordable as Choice to Gem notes have been going for $500 to $800 each. [2] *($400-600)*

2851 **$5. SC. 1934A Mule.** An eleven piece lot of 1934A Mules, including: 6 DA blocks grading **EF** , 2 flat **CU,** a consecutive pair in **CU to CCU** and a **CCU;** 2 EA blocks in **AU** and **CCU;** 2 FA blocks in **AU** and **Gem** and one GA block in **Choice AU.** The EA block is the only one seen frequently; all the others are difficult to locate. 2853 **Trio of $5 SC. 1934 A 637 Mules.** 1 KA 637 and 2 LA 637 Mules in **Fine to VF.** [3] *($200-400)*

2854 **$5. SC. 1934A. Mule** No.L24664250A. This is the highest observed 637 Mule, and is listed as such in Oakes/Schwartz. This is the more difficult of the two 637 Mule blocks in this series. The LA was EF in the Taylor Collection, and missing from the Williams Collection. Near the top of the condition census, this 637 Mule would be a Gem if not for a light center bend. **Choice AU.** *($600-800)*

2856 **$5. SC. 1934A Mule/1934A changeover pair.** Mule No.F41347848A/F41347849A. This COP is on a scarcer block, and only one other is listed in Oakes/Schwartz. **Crisp Uncirculated.** [2] *($300-500)*

2857 **$5. SC. 1934A.** No.K36341988A. Leave it to Dave to find one of these scarce short run blue seals that falls between the first and second run of the North Africa yellow seals. 2862 **$5. SC. 1934B. Mule** No.L35916529A. A well centered, fully embossed example of this scarce series 637 Mule. The 1934B's in regular and Mule are many times scarcer than the 1934C. Fully Gem but for the faint remnant of a paper clip depression. **Choice-Gem Uncirculated.** *($400-800)*

2863 **$5. SC. 1934B. Mule** No.L29976639A. An attractive 637 Mule for one who demands a bit lower quality than Gem. **EF-AU.** *($200-300)*

2864 **Four 637 Mules.$5. SC. 1934B.** L27975043A **VF-EF,** pressed. L21083692A **VF**. L19623219A **VF** . L84069273A **Fine,** and the high observed 1934B LA 637. A nice group of the scarcer Mule 637 series. [4] *($400-600)*

Rare 637 Mule Star

2865 **$5. SC. 1934B. STAR Mule** No.*11768849A. Only five are known of this rare Mule Star, with the finest being an EF. This problem free VG is worth a strong bid. A CU note, if it existed, should be worth $5000. **VG.** *($500-1,000)*

2866 **Seven $5. SC. 1934B** 1 KA **VF,** 1 **Choice to Gem**; 5 LA, **CU** but lacking embossing. The KA block is a beauty, and much tougher than the LA block. [7] *($400-600)*

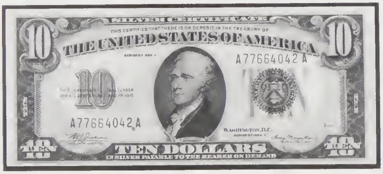
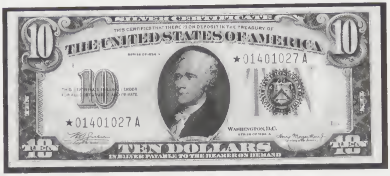
Rare Face Plate 87



2909 **$10. SC. 1934A.** No.A77664042A. The finest we have ever seen. The Taylor Collection did not have one, and the Williams' specimen we sold in Memphis 2001 was a VF with an estimate of $1000-$1500. That piece brought $2150 after a spirited floor battle. This note is an original CU with just the slightest handling and a small brown spot caused by an inclusion in the paper near the left serial number. By far the best we have heard of, with generous embossing and original surfaces. Very likely the finest known, and sure to become the centerpiece of a fine $10 Silver collection. **Crisp Uncirculated.** *($4,000-6,000)*

2910 **$10. SC. 1934A** 5 Piece 1934A Group. This desirable lot of difficult to find 1934A $10 Silvers consists of A85200709A in **Fine to VF** with the first macro face plate #129; A85607851A has full embossing, great eye appeal, and just a wisp of a center fold, **Choice AU;** B16003538A is an original **AU** and B17379501A is **CU** and would be a Gem but for some apparent handling. This lot is completed by the Star *01534949A in original **Choice Fine to VF.** [5] *($400-700)*



2911 **$10. SC. 1934A. STAR** No.*01401027A. A bit flat, but with the eye appeal of an AU. **Choice VF-EF.** *($300-600)*

A very difficult note in any grade above Fine, and easily worth the Oakes/Schwartz valuation of $200 in VF. [3] *($500-600)*

2913 **$10. SC. 1934A. Mule.** Most collectors have difficulty finding even one of these Mules. Now I know why I could not fill want lists - Dave was hoarding them all! **Fine-VF** Group of Five. [5] *($500-700)*

2914 **$10. SC. 1934B.** No.B19191680A. A very lightly pressed Choice VF to EF note that looks Choice EF at a glance. The key to the set. **VF-EF.** *($300-600)*

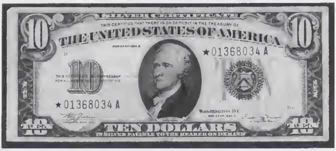
1934B Star



2915 **$10. SC. 1934B. STAR** No.*01368034A. The scarcest of all the regular issue Stars. This fine note has been circulated throughout and it appears that there was some pencil removed from the left of the portrait. A pleasing circulated example with only 10500 printed and a note infrequently offered. When they have been offered in auctions, price realizations range from $1650 for a Fine, $3700 for a VF, and most recently a true Gem sold for $25,300. A more affordable example of this popular Star. **Fine.** *($1,300-1,900)*

2916 **$10. SC. 1934C.** B34480154A is **Choice AU** and has the first face plate 214. B29667138A has the last face plate 232 and is **Gem.** [2] *($200-300)*

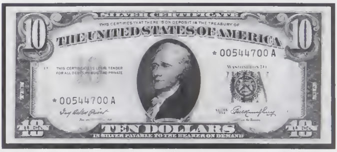
2920 **$10. SC.** Two 1934D Wide Stars, **F-VF,** one with pinholes; and a 1934D Narrow BA block washed and pressed **VF.** Both the Wide Star and Narrow BA blocks are nearly impossible to locate in CU. [3] *($200-400)*

2921 **$10. SC. 1934D.** Three Narrow BA blocks: one **Choice VF,** one just a corner tip fold from **EF,** and a **Choice EF.** We have seen only one CU and nothing approaching Gem. The Taylor Collection only had an AU; this narrow variety is scarce in any grade above VF. [3] *($400-600)*

2922 **$10. SC. 1953.** 1 **AU**, 2 **CU,** 1 **CCU to Gem.** An attractive group of notes with the CU notes having a shot at Choice. [4] *($500-800)*



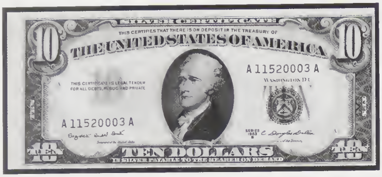
2923 **$10. SC. 1953. STAR** No.*00544700A. A Gem just 104 notes away from this one sold for $1050. The Choice CU Taylor example brought $690. This near Gem should bring between these two realizations. **Choice-Gem Uncirculated.** *($700-900)*

2924 **$10. SC. 1953. STAR** No.*00134952A. Three light folds through well embossed white original paper makes for an attractive alternative to the Choice to Gem note. This example with the lowest back plate 1448. **Choice EF-AU.** *($250-400)*

2925 **$10. SC. 1953A.** No.A10492081A. This near Gem piece has all the attributes of a full Gem; incredible embossing and great contrasting inks on the cream white paper of the period. With just a bit more margin on the left this note would be superb. **Choice-Gem Uncirculated.** *($300-500)*

2926 **$10. SC. 1953A.** No.A10518653A. Cut tighter on the bottom, but with all the attributes of a Gem note's originality. **CCU.** *($250-500)*

2927 **$10. SC. 1953A. STAR** No.*00591443A. A three fold Choice EF lightly pressed, to make it appear CU with face plate #1. With only 144,000 printed, Gems have been exceeding the $1500 mark. **Choice EF.** *($400-700)*



2928 **$10. SC. 1953B.** No.A11520003A. This is the #3 note for the series. The first or #1 note would have serial #11520001. Evidently the first few sheets had cutting alignment problems, accounting for the tight margins which keep this original note from a higher grade. **Choice Uncirculated.** *($700-1,000)*

2929 **$10. SC. 1953B.** No.A11520079A. This series started at 11520001, making this the #79 note. **Choice CU.** *($250-400)*

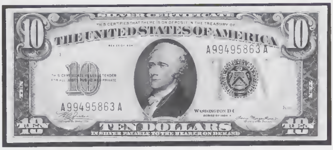
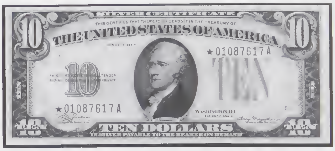
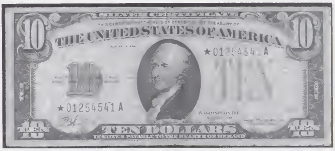
Rare Blue Seal North Africa



2971 **$10. WWII - North Africa. 1934A.** No.A99495863A. This amazing piece was the subject of an article by Dave Schlingman in the 2002 July/August issue of *Paper Money.* Serial numbers A91044001A through B00904000A were all issued as yellow seals, and this note is only one of three known to exist at present. Dave and other paper money experts concur that this note was changed to a blue seal by an artisan of some talent in Italy. The motive was the fear that the yellow seals were going to be demonitized, so the native population somewhere in Italy decided to alter the yellow seal to blue. Under magnification you can plainly see that the seal is not accurate in all its detail, but is still remarkably well done. It appears that a chemical removed the yellow seal and actually also removed part of the bottom of the first "9" in the serial number. Then either by die impression or by hand this blue seal was applied. An incredible job during a time when a ten dollar bill could mean a big difference in someone's life Strangely the note appears CCU, but is a bit flat. A marvelous specialty item for the small size aficionado. **Choice Uncirculated.** *($1,000-2,000)*



2972 **$10. WWII - North Africa. 1934A.** No.*01087617A. Possibly pressed, but truly rare in original Gem condition. **AU.** *($500-1,000)*



2973 **$10. WWII - North Africa. 1934A. STAR** No.*01254541A. This is the observed high in this more interesting NA Star variety, with late finished face plate #86. Very scarce! **VG-F.** *($500-900)*

Excellent margins, crisp paper, and bold sharp pen signatures make this a particularly pleasing note. Another rarely offered Large-only bank with **just eight notes in the census. The Finest Known note on the bank,** and a prize for any California collector. The only rival to this note for "Finest Known" is the #154 $50 note sold in the May 2003 sale. It was catalogued as "VF+", but is listed by Kelly as F-VF, and the photo in the catalogue shows it is obviously not quite as nice as this one. Half the known notes grade VG or Poor.

A Large-only bank, with **just eight notes in the census.** They are infrequently available in any grade, and the only one ever graded higher than this was a "Fine+" in the 1997 Memphis sale; a quick look at that catalogue will show that the note we offer here is much nicer. The Horwedel note auctioned last September for $1,035 was graded Fine, and is fairly close to this one. As **the Finest Known note on the bank,** this should attract considerable interest. ***($1,000-2,000)***

United States Paper Money Records
By Martin Gengerke
2001. 275pp, spiral bound.

***Book or CD....*$125.00**

Before you buy a single piece of Federal Paper Money, there are several things you really need to know. How many times has a particular note appeared in auction or sales or in dealer price lists? How was a specific note graded in its previous appearances? What is the 50-year price history and provenance of that note? In United States Paper Money Records Gengerke, one of America's leading experts on Federal Currency has compiled and unprecedented data base of facts and figures that every major dealer or collector should have in their own library. There are over 10,000 auction or price list appearances recorded; each note listed is identified by Friedberg number and serial number and Gengerke gives "summary" grades when more than one grade has been recorded for a single note. This priceless work is also available on CD-ROM, and lists over 76,000 notes, in database, spreadsheet, and text formats, for IBM compatible computers.

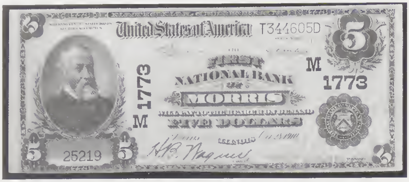
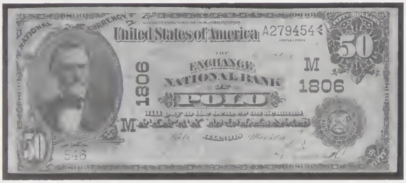
4098 **Ch.5303.** *Herrin.* **First NB. $100. Fr.705.** 1902 PB. No.613/613 A. **Choice EF.** Bright, clean and crisp, with excellent margins and just three vertical folds. A nice family named bank signed as cashier by John Herrin. **Kelly's census shows only ten Large notes known.** This new addition makes eleven, and is only the second $100 note, and matches the other in condition. ***($2,750-3,750)***



4099 **Ch.M1773.** *Morris.* **First NB. $5. Fr.601.** 1902 PB. No.T344605D/25219 D. **VF.** Clean and fairly crisp, but a bit tight at the bottom left. Good signatures and bright color make this second title note quite attractive. *($500-750)*

4100 **Ch.2926.** *Paxton.* **First NB. $10. Fr.1801-1.** 1929 T1. No.A001180A. **VG.** Evenly worn, and clean for the grade. Of the fourteen Small notes in the census only one is significantly nicer. *($300-400)*



4101 **Ch.M1806.** *Polo.* **Exchange NB. $50. Fr.670.** 1902 DB. No.A279454/546 C. **VG-F.** Close at the bottom, but solid for the grade, with decent pen signatures. There are a couple of high grade First Charter $5s in the **ten Large notes known,** but the rest are all fairly low grade. **This is the only 1902 Date Back note reported.** *($1,000-1,500)*

Note - Kelly lists 12 Large notes known, but a quick look at the serial numbers for the First Charter $5s he lists will show some definite problems - it's our guess that the count is 10 Large known.

4267 **Ch.13965.** *Brockport.* **Brockport NB. $10. Fr.1801-2.** 1929 T2. No.A002589. **VF.** Somewhat dirty on both sides, with a couple of small nicks out of the bottom margin. Rarer than the statistics indicate, as six of **only ten notes known** are on one uncut sheet, leaving only four single notes available. Two of the four are soiled and a bit lower in grade than this one, while one is a bit nicer. In addition, the Gengerke sales records show **only three public offerings of this Charter number in over sixty years,** so holding out for a cleaner note may not be too sharp a move. ***($1,500-2,500)***

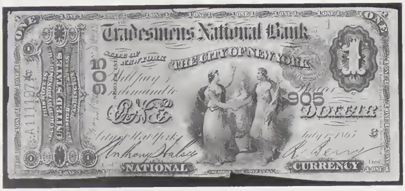
Serial Number 1 New York $1



4289 **Ch.905.** *New York.* **Tradesmens NB of The City of NY. $1. Fr.383.** 1875. No.A111197/1 C. **Choice EF. A beautiful Number 1 Ace, with bright white paper and vivid red overprint contrasting nicely with the bold blue anti-counterfeiting color left of center.** Nice sharp signatures add to the desirability. This note comes from the Number 1 sheet that was cut up in the 1950s or earlier, when James Wade had the $2. Kelly grades the three $1 notes as Fine, Fine, and EF (this note), and the $2 as Good. The other three other notes have all been graded by several different firms much higher than their Kelly grades, and we suspect that at least the $1 notes are really close to this one in condition. The sheet was obviously very carelessly hand separated, as the margins on all notes (including this one) are quite irregular. Nationwide a total of 91 Number 1 Aces have been recorded. Only about twenty are even marginally better than this one on technical merit, but far fewer look nicer than this. Regardless of technical grade, all the notes from this sheet are visually very attractive notes indeed! ***($7,500-12,500)***

4290 **Ch.5936.** *Northport.* **First NB. $10. Fr.633.** 1902 PB. No.1652/1652 B. **Fine.** The upper right corner (1/4") has a split, and is nearly detached, but the note is clean for the gradeand quite pleasing, with nice bold pen signatures. A very interesting and rare Suffolk County, Long Island bank that until now has had **only three Large notes known.** Not surprising, as **the outstanding Large Size balance is a minuscule $790!** Those three are a $10 1882 Date Back double denomination, a $10 1882 Date Back with an inverted back, and a $10 Value back, all from Fine to VF. The Date Backs were last sold in 1998, and the Value Back has no public track record. This is the first "normal" note publicly available on the bank, and given the popularity of Long Island, anything is possible. ***($3,000-5,000)***

A few splits and some tiny slightly rusty pinholes are hardly noticeable, but the signatures are plain enough. What this note lacks in condition it more than makes up for in rarity. **The census currently lists only two other notes on the bank** - a $5 Orig. Series in Fair, and a $1 Orig. Series, listed by Kelly as VG, but not seen by us. **The Gengerke sales records show only two public sales prior to this** - the $5 appeared in a 1979 Hickman & Oakes sale, and later in the Lyn Knight August 2000 sale, where it brought over $1,100 despite its rather ratty condition. Given the advance of the Nationals market in the past five years, the better condition of this note, and its higher denomination, a strong bid for this rarity is indicated if you want to be the new owner! ***($2,500-3,500)***

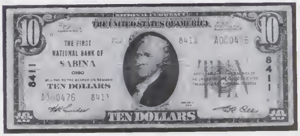
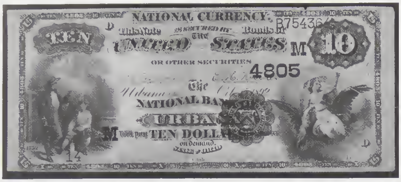
There are **only nine Small Size notes in the census,** and this is **easily the Finest Known** - the other eight range from VG to just VF. ***($700-900)***



4323 **Ch.8411.** *Sabina.* **First NB. $10. Fr.1801-2.** 1929 T2. A seldom available bank, with **ten Small notes in the census,** only one of them better than VF. ***($350-450)***

4324 **Ch.4792.** *Sandusky.* **Third National Exchange Bank. $20. Fr.1802-1.** 1929 T1. No.A000399A. **Fine+.** Good margins, with even wear. ***($175-250)***

4325 **Ch.M9446.** *Springfield.* **Farmers NB. $10. Fr.626.** 1902 PB. No.E76971E/18259 C. **Fine** or a bit better from the standpoint of wear, but the top and bottom edges show some staining and small nicks from corrosive contact long ago. Not really too serious, as the effects only reach the engraving here and there, and only by a millimeter or two. Still scarce, and not often seen. ***($200-300)***



4326 **Ch.M4805.** *Urbana.* **NB of Urbana. $10. Fr.540.** 1882 DB. No.B754364/14 D. **VG** in terms of wear, but with substantial soiling on the back, and splitting in the top center. A bit toned, and the signatures are gone. A new addition to the census, and only the third note known prior to the third charter period. ***($500-750)***

4327 **Ch.M164.** *Zanesville.* **First NB. $10. Fr.624.** 1902 PB. No.T421674D/31792 F. **About Fine.** A bit close at the bottom right, with some scattered small pinholes, but the stamped signatures are legible and the appearance good for the grade. ***($200-250)***

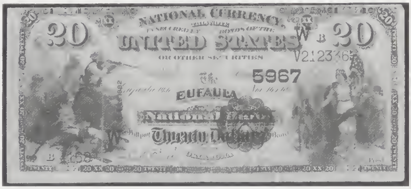
4329 **Ch.5129.** *Durant.* **First NB. $10. Fr.632.** 1902 PB. No.11040/11040 C. **Fine.** Evenly worn, with colorful stamped signatures and no defects. ***($400-600)***



4330 **Ch.W5967.** *Eufaula.* **Eufaula NB. $20. Fr.583.** 1882 VB. No.V212336/4168 B. **Fine.** Three broad margins, the top trimmed just slightly into the design. Good purple stamped signatures, with no pinholes, splits, etc. A scarce bank, with **ten notes in the census,** all well circulated. The Gengerke sales records few public appearances, and none at all in the past five years. This is one of two known $20 Value Backs. Of the ten notes reported for the bank only one grades higher - a $5 Plain Back. ***($1,750-2,500)***

To clarify the census figures quoted above - two notes (the $20 Value Backs, SN's 3711 and 3712) listed on Kelly's CD are actually mislistings of notes from the First National Bank of Eufaula, Charter 5902. Our thanks to Dave Koble for verifying the bank on the 3712 note that he sold in 1988.

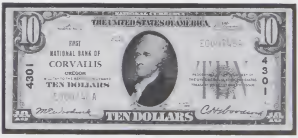
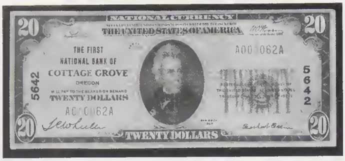
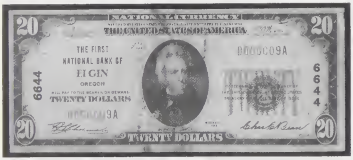
4335 **Ch.8691.** *Burns.* **Harney County NB. $5. Fr.600.** 1902 PB. No.5692/5692 G. **VG.** Well used, with soiling typical of the grade, and the signatures are gone. Surprisingly for a VG, there is no edge weakness anywhere. The rarer of the two banks in Burns. **One of only two Large size notes known -** the other, variously described as from Fine to VF, brought over $900 in an auction six years ago. ***($2,500-3,500)***



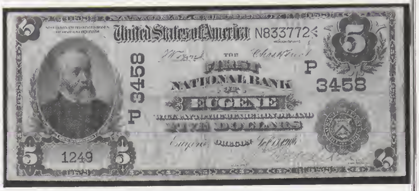
4336 **Ch.4301.** *Corvallis.* **First NB. $10. Fr.1801-1.** 1929 T1. No.E000746A. **F-VF.** Clean for the grade, and problem-free. One of the nicer Small notes known on the bank, all of which are circulated. ***($400-600)***



4337 **Ch.5642.** *Cottage Grove.* **First NB. $20. Fr.1802-1.** 1929 T1. We can find a record of only one Small Size note selling at auction - a $10 that brought over $500 at a F.U.N. sale over ten years ago. All seven notes on the bank grade from a low of VG to a high of Fine. ***($2,000-3,000)***



4338 **Ch.6644.** *Elgin.* **First NB. $20. Fr.1802-1.** 1929 T1. No.D000009A. **Fine** or so in terms of wear, but with some disconcerting red and brown staining on both sides. Another **very rare one-bank town.** No Large notes are known and **only four Small notes have been reported** - two $10s and two $20s. Not a pretty note, but they're available so infrequently it's still worth considering. ***($400-600)***



4339 **Ch.P3458.** *Eugene.* **First NB. $5. Fr.591.** 1902 DB. No.N833772/1249 C. **VG.** Decent margins all around, with no defects. This one is from the so-called **"Fourth Charter Period"**dated March 22, 1922. The only Large Size note ever auctioned was a 1902 $10 sold in 1987, and the few other public auction appearances for the bank were for low grade Small Size notes. ***($750-1,000)***

4400 **Ch.E5085.** *Waynesburg.* **Peoples NB. $20. Fr.580a.** 1882 VB. No.T488813/6415 B. **VG-F.** Tight at the bottom right, but with good pen signatures and no pinholes, splits, etc. A very scarce bank that closed in 1923. **Only ten notes are reported for the bank today.**
Although Nationals are usually collected by Bank, City, State. etc., **the Treasury Signatures are of particularly interest here.** Register of the Treasury James F. Tillman and Treasurer Ellis H. Roberts were in office concurrently for only 154 days, from July 1, 1897 to December 2, 1897. Treasury policy at the time dictated that National Bank Notes would have the date of a bank's charter engraved on them, and that that the Treasury signatures engraved on the note would be those of the officials in office as of that date. Very few banks were chartered (or rechartered) during this brief 154 day period, and fewer still issued Value Backs (rather than Brown Backs or Date Backs). Consequently, **of over 280,000 National Bank Notes for which we have serial number data only four Tillman-Roberts $20 Value Backs have been confirmed** (and two others suspected). When one reflects on the frenzy of recent years regarding a similar situation with the "rare Barr Dollars" (easily available by the pack), **it is interesting to observe what true rarity really is!** ***($2,500-4,000)***

A few unobtrusive pinholes can be found at the left end. This pretty note from the Don Gilletti Collection has an interesting grade history - it is listed in the Kelly census as EF, and was sold in the 2004 Memphis sale as CU. As is often the case, the truth lies somewhere between - light teller handling at the ends, slightly rounded corners, and the pinholes keep it from strictly Uncirculated, yet the originality and deep embossing make EF unduly harsh. ***($350-500)***

As anyone who has tried to find nice looking First Charter notes recently will affirm, any note this attractive will have no trouble drawing bidders like ants to a picnic. This note is probably the one listed without serial numbers by Kelly, as the grade matches. Pen cancelled in purple ink on 30 May 1873 by Robert Butler, the acting Receiver General. Only four issued notes are known, one of which is in the collection of the Central Bank of the Bahamas. Last recorded sale was at the NASCA auction of the George Thomas collection on May 27, 1980. An extraordinary rarity and a once-in-a-generation opportunity to obtain the first issue of Bahamas currency. Somewhat aged paper but note is fully intact and legible. **Fine.** ***($12,500-Up)***

In late 1866, Rawson W. Rawson, Governor of the Colony, submitted a proposal to the British Government for the issue of 15,000 pounds of legal tender bank notes secured by specie in the Public Bank. The proposal was initially declined but after some political machinations, a resolution was finally passed on October 17, 1867 to issue 1 and 5 pound notes for the payment of public officiers. The order called for printing 5000 1 pound notes in light blue and 1000 5 pound notes in light carmine. Governor Rawson on the same date provided a hand-drawn facsimilie of the 5 pound note that he had ordered lithographed by The Major & Knapp Engraving Manufacturing & Lithograph Company of New York. An interest of 6% per annum on the issue was allowed and the notes were made receivable in payment of duties and taxes in the purchase of debentures. Anticipating a delay in shipment of the notes, the Executive Council approved on October 23 the printing of provisional certificates in Nassau. A total of 951 pounds of these notes were printed (P-A9), which was sufficient for the required salary payments. These provisional notes, however, had no legal tender status at the Public Bank

In December 1867 the first of the Treasury Notes lithographed by Major & Napp were issued. They were reasonably well received by public servants, contractors and other government creditors. More notes were issued in the following months, but by early 1869 after a new Governor and Secretary of State in Britain had taken office, a resolution required that any notes issued to civil servants must not be interest bearing. In February 1869, any further issue of the Treasury Notes was forbidden. A total of only 2000 pounds of Treasury notes were issued under Gov. Rawson's order. It took several years for all the outstanding notes to be redeemed, but in 1875 the circulation of the first issue of Bahama paper money came to an end.

Three sets of the 1 and 5 pound notes have been reported in private collections, and a fourth is held by the Central Bank of the Bahamas. A printer's proof of the 5 pound note also is known. The hand-drawn facsimilie of the 5 pound Treasury Note and the 1 pound Provisional Note reside in the Bahamas Archive collection.

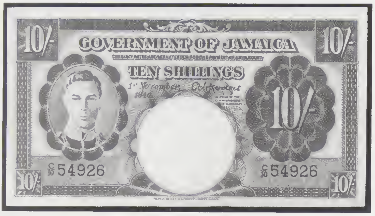
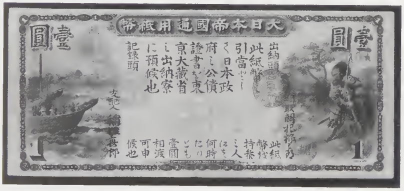
Jamaica



4730 **Government of Jamaica.** November 1, 1940. **10 Shillings.** P-38b. Blue KGVI variety. Famous so-called "Whiskey" note, a shipment of which was sunk on a ship carrying a cargo of whiskey early in WWII. Paper is a little stiff from being wet but does not have any water damage or stains typical of the issue. Original embossing still present. **Choice AU.** *($225-300)*

4731 **Government of Jamaica.** April 7, 1957. **10 Shillings.** P-39. Deep purple KGVI note. Pineapple watermark. Heavy raised inking and incredibly deep embossing. A handling crease on right. A beautiful, original piece. **AU-Unc.** *($250-300)*

Japan



4732 **Great Imperial Japanese Circulating Note.** 1873 "Paper Currency" Is. **1 Yen.** P-10. Toyohashi District, Charter 8. First note in this classic series printed by the Continental Bank Note Company, hence the resemblance of the back of the note with its black vignette in green border to the First Charter US National Bank notes. The front of the note has an imposing warrior with bow and arrows at the right, and the prow of a ship carrying Mongol warriors on the left. The incredible back vignette depicts the defeat of the typhoon-wracked Mongols at Hakata harbor in 1281. This highly desirable rarity has great eye appeal, and its scattered pinholes and a very light owner's stamp on the back are only minor distractions. A much scarcer national bank variety than the Tokyo issue. Higher grade examples command $6000-up. **F-VF.** *($3,000-5,000)*

Unique Palestine Error Note

This is the only known existing Palestine note with mismatched serial numbers (R. Dubbah, 2005). Some blue marks across face possibly indicating cancellation or withdrawl of note. 4798 **Palestine Currency Board.** September 1, 1927. **5 Pounds.** P-8a. Prefix A. Classic date rarity. Only 4 originally known (H. Berlin, 2001) but with claims of up to 11 now reported (R. Dubbah, 2005). No public sales of an issued 1927 have been reported in recent memory and this is a special opportunity for the advanced Palestine collector to acquire one. The note has tattered borders and a couple fold tears but the paper still has good body. Minor graffiti. **VG.** *($25,000-Up)*

4799 **Palestine Currency Board.** September 30, 1929. **5 Pounds.** P-8b. Prefix B. A more affordable date variety but still uncommon in better grades. A fresh, crisp note with a couple small margin tears on left and a hit of graffiti on back. Fully original. **VF.** *($1,250-1,500)*

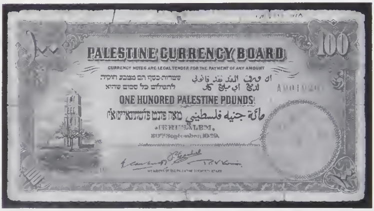
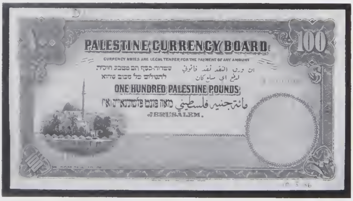
4802 **Palestine Currency Board.** September 30, 1929. **50 Pounds.** P-10b. Prefix A. Vey rare issued note. A total of 26 notes are known to exist (R. Dubbah, 2005) and the note offered here is one of the higher grade ones. The last issued 50 pound note in gVF condition on the market sold for 34,500 pounds in April, 2003 at a Spink auction. This is a lovely, fresh note with some insignificant light stains on the back and graffiti "7000" in the watermark area. Grifitti in the form of a teller's number or counting mark is common to this high-denomination note. A fully original **Choice VF.** *($40,000-Up)*

A Classic World Rarity



4803 **Palestine Currency Board.** September 30, 1929. **100 Pounds .** P-11b. Prefix A. The issued 100 pound Palestine note is arguably the most famous and sought-after world banknote. Five are known, of which only three are available to collecters. The one offered here was the first known of the five notes that originally came from a private sale to Jack Fisher in 1970 (H. Berlin, 2001). The note was later acquired by H. Berlin and its current consignors, Jerry and Diane Fishman. This is the first public sale of an issued 100 pound Palestine note in over three decades. **VG.** ***($175,000-225,000)***

Extremely Rare Palestine Essay Proof



4804 **Palestine Currency Board.** 1936 A Series. P-Unlisted. One of two types of trial proofs of a **100 pound** note prepared by the De La Rue Company for the Palestine Currency Board in 1936 (R. Dubbah, 2005). Red serial numbers A000000. This is the "D" type proof with a light silhouette of the Palestine Great Seal on a dark background in the watermark area. (The other "N" type has a dark silhouette against a light background.) The handwritten date "10.3.36" in the right lower margin is likely the date that the proof was sent from the printer to the Currency Board. This trial proof has a vignette of the al-Jazzar Mosque in Acre at the left instead of the Crusader's Tower in Ramleh that appears on the issued notes. The back also depicts a quite different view of the Tower of David from that on the issued version. Unissued and extremely rare. **AU-Unc.** ***($75,000-10,000)***

In 1864, Dr. Walter Brooke Roberts, a New York dentist, was offered the opportunity to buy stock in a Pennsylvania oil well which, upon inspection, turned out to be a complete fraud. Dr. Roberts returned from the Pennsylvania oil fields totally convinced that there was money to be made in oil, and he discussed the matter with his brother, Colonel E.A. L. Roberts. At this point Colonel Roberts told him of an invention he was working on, an explosive torpedo designed to restore the flow of wells that were no longer producing, and to increase the production of wells that were producing. The brothers immediately agreed to organize the Roberts Petroleum Torpedo Company.

With six torpedoes ready for testing, Colonel Roberts headed for the oil fields of Pennsylvania and talked a dubious oil well owner into trying the new product.

The torpedo consisted of a long metal cylinder filled with gunpowder and attached to a steel cable, and was carefully lowered into the well. When it reached the bottom a metal weight was dropped down the wire to set off the charge. There was a tremendous explosion and smoke, rocks and metal fragments flew out of the hole and rained down on the observers. Moments later a bucket on the end of a rope was dropped down the hole and hauled back up, full of oil! The test was an unqualified success.

It was so successful that for the next twenty-five years the Roberts Brothers would spend a great deal of their time and energy fighting patent infringements and "moon-lighters" who produced their own unlicensed torpedoes.

Standard Oil Company,

John D Rockefeller

5036 **Standard Oil** (OH) 1877. #122. **25 shs.** Black. Capitol Building. Liberty with flag and sword ("The Standard Bearer"). The original Standard Oil founded by **John D. Rockefeller** and signed three times, once as president, again on the transfer stub, and again on the reverse. Also signed by **Henry Morrison Flagler** as secretary. Lightly cancelled in red pen through the vignette and the officers' signatures, hardly distracting. An extremely important piece of American financial history representing the early days of one of America's most significant industries. *($12,500-17,500)*

When it was first incorporated in 1870, shares in the original Standard Oil were very tightly held. There were only five shareholders at its inception, and ten years later there were only forty-one. Standard Oil was the world's largest oil refiner, controlling 90% of the U.S. Oil business at that time.

John D. Rockefeller (1839-1937) was the dominant figure in the oil industry until his retirement in 1911. He started his business career as a bookkeeper, and by age 19 was a partner in a produce business. He began operating a small refinery with his partners, and quickly became alerted to the growing investment possibilities in what was then a fairly new industry. In 1870, he organized the Standard Oil Company of Ohio and proceeded to achieve control over 90% of the oil refineries in the country. Rockefeller had little interest in discovering oil; he left that to wildcatters and other speculators. He concentrated on the transportation, distribution and sale of petroleum products, building a fortune estimated at over a billion dollars.

Henry Morrison Flagler (1830-1913) with J.D. Rockefeller organized the Florida East Coast Railway (1886) and built great hotel resorts in St. Augustine and Miami (1892-1896).

John Charles Fremont (1813-1890), was an army officer, explorer, and one-time candidate for President of the United States. He blazed paths to the West, including the famous "Oregon Trail". Fremont's huge estates and the discovery of gold in California made him rich. He served briefly as one of California's first senators, and in 1856 his wide popularity and anti-slavery opinions won him the Republican nomination. Questions about some of his ethical practices probably cost him the election.

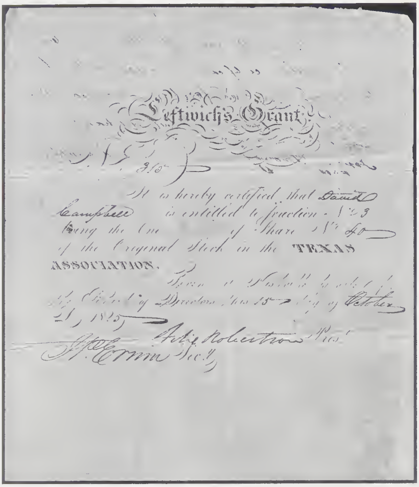
Historically Important Texas Certificate!



Leftwich's Grant

5131 **Leftwich's Grant** 1825. *Texas Association.* **1/8 Share.** Partly printed document. **VF.*** ***($3,000-5,000)***

The term "Texas Association" was used for a group of 70 men who, on March 2, 1822, in Nashville, Tennessee, asked permission from the independent government of Mexico to settle in Texas. Robert Leftwich, the most important member, carried the request to Mexico City, but it took three years to secure a colonization contract. He received a contract on April 15, 1825 to introduce 800 families, but because the money advanced by the Texas Association had run out, he got the contract in his own name. On August 6, 1825 Leftwich sold his contract "Leftwich's Grant" to the Texas Association. The contract gave permission to introduce colonists into an area covered by 17 present day Texas counties, including: Bastrop, Bell, Brazos, Burleson, Burnet, Comanche, Coryell, Falls, Hamilton, Lampasas, Lee Limestone, McLenna, Milam, Mills, Robertson and Williamson. This area was referred to as Leftwich's Grant until October 15, 1827, when Stephen F. Austin, acting as agent for the Texas Association, referred to their petition as the "Nashville Company" rather than the "Texas Association".

In 1830 Sterling Clack Robertson, acting under a subcontract, began to recruit families and bring them to Texas. After much legal maneuvering with Austin, Robertson confirmed the boundaries as had been defined in the original Nashville Company's contract. In 1834 Robertson was recognized as the empresario of the colony by the State Government of Coahuila and Texas. Robertson introduced 600 families, many at his own expense, before the Texas Declaration of Independence in 1836.

This is the nicest of only four certificates recently discovered. **An Historically Important Find.**

5132 **Texian Loan** 1836. *Cr. 36a4.* #526. **$320.** 8% Bond. Ornate border. Signed by **S.F. Austin** as commissioner. Triangular shaped cut out in the center. **VF+.** ***($1,000-1,500)***

This bond, convertible into Texas land at 50 cents per acre, was signed by Stephen F. Austin, son of Moses and Secretary of State of Texas at his death; B.T. Archer, another Texas cabinet officer, and William H. Wharton, a member of the Texian Congress etc. The bond is printed by Benjamin Levy, of New Orleans, who did a number of bonds for Louisiana. **Stephen F. Austin** (1793-1836) was an important founder of Texas. In 1822 he started the first legal settlement of Anglo-Americans. Austin acted as executive, lawmaker, chief judge and military commander of the territory. He was soon engaged in the Texas Revolution, serving first as commander of the volunteer army and then as commissioner to the United States in an effort to secure aid and sympathy.

5139 **Revolutionary Bounty Land Scrip** January 17, 1832. #3890. **$100.** Hessler X98. "100 Dollars 80 Acres" in the left border. *($500-750)*

Issued under the Act of May 30, 1830. Officers and soldiers, sailors and marines of the Continental line and of the Virginia service who were entitled to military land bounties, or their assigns, could surrender these warrants to the Secretary of the Treasury "and receive certificates or scrip for the same". These Bounty Land Scrip Certificates were receivable for land purchased in Ohio, Indiana and Illinois. Printed by W. Harrison, "W. City".

The Treasurer's signature has been cut away, the Commissioner's signature is cut cancelled. Pieces are out of the right side, but the major design elements and text are almost complete. There is a beautiful embossed Treasury seal between the signature blocks.

Rare, and historically important, as it illustrates the fact that the Federal Government was still attempting to grapple with the debts of the Revolution over fifty years after the Declaration of Independence.

This is the earliest known American copper or steel plate engraved share certificate with a vignette. The impression is crisp and sharp. The back has transfers listed to 1900, when the certificate was called in. **William Bingham** (1752-1894) was an American Political leader. He founded the Bank of North America, which was chartered in 1781. He served in the Continental Congress (1786-89), Pennsylvania Assembly (1790-95), and the U.S. Senate (1795-1801).

Robert Morris (1734-1806) arranged for the financing and purchase of supplies for Washington's armies, served as superintendent of finance, founded and organized the Bank of North America, and was a delegate to the Constitutional Congress. Morris and his partners speculated heavily in Western lands, believing that aristocrats fleeing European revolutions would be willing buyers. This trend did not develop, and Morris, despite his relationship with George Washington, ended up in debtor's prison.

Comprehensive Catalog and History of Confederate Bonds **$45.00**
By Douglas B. Ball, Ph.D.
1998. 288pp, hard cover.
In the book that renders all previous Confederate Bond references obsolete, Ball identifies close to 400 different Confederate Bond varieties including several great rarities unlisted until now. Hundreds of illustrations help even the most inexperienced collector match a bond to its catalogue listing. In addition, the book gives an in-depth history of the bond signers, the printers, the legislation, the Coutts Bank Hoard, and more, such as new, up to date rarity listings for every bond; prices for two different grades; number range information not available in any similar publication; and comprehensive "Ball" numbers for all listed bonds (plus a cross-reference to Criswell numbers). This is far and away the best book on the subject of Confederate Bonds. Order today and reap the benefit of Dr. Ball's many years of dedicated research.

($5,000-7,500)

This document relates to the very early history of securities trading in America. In 1790, Alexander Hamilton proposed a method of handling state and federal debt by issuing government bonds, to be freely traded in the market place. In August of that year, brokers met in Philadelphia and began buying and selling the available publicly-traded securities, which consisted mostly of Revolutionary War debt instruments. These securities were bought and sold in public auctions, by professional auctioneers hired by the brokers. Intense speculation developed, soon leading to a crash in February and March of 1792.

In response, state laws were passed, banning the public auction of securities. This key historical regulatory development caused New York's leading brokers to react by drafting and signing "The Buttonwood Agreement" of May 1792, in which they agreed to trade only with one another, and to set commissions at a minimum of a quarter of one per cent. This in effect, created a private club for securities trading. A committee was soon appointed to provide a more suitable location to meet than under a tree.

In the vicinity of Broad and Pearl Streets was the old Merchants' Coffee-House. In front of that building, on December 1st, 1791, the sheriff of New York, Marinus Willett, sold a piece of property formerly occupied by Anthony Bleeker, and known as No.22 Wall Street, to five merchants for $2,510. They were acting under the provisions of the Tontine Association.

In 1792 construction began on the Tontine Building. The original building fronted on Coffee-house Slip, now the corner of Wall and Water Streets. Later that year a group of 24 men would begin to conduct the trading of securities in a room on the second floor.

By 1817 this group, which had evolved into the New York Stock Exchange, had outgrown the Tontine Coffee House. On March 8th of that year they moved to larger quarters at 40 Wall Street.

The consignor has assured us that he obtained three examples, part of an estate, and that he has no more. Whether or not the other two will come onto the market soon has not yet been determined.

In our March 2005 auction, a 25 Cent scrip note from the Tontine Coffee House, dated 1851, brought $4,025. Based on that result, and on the historic significance of this example, our estimate may prove to be conservative.

5159A Peter Allaire Financial Documents. ***($400-600)***

American merchant; a loyalist, he spent the years of the American Revolutionary War in England and France, and was suspected while in Paris in early 1782 of attempting to poison the great Benjamin Franklin; after weeks of confinement in the Bastille, he was released after providing convincing evidence of his innocence; he returned to America in 1783, built a home on Harrison St. in New York City, and became a respected member of the community; he was among those who subscribed to fund the building of the Tontine Coffee House as a place where brokers could sell and exchange securities, at the foot of Wall St., thus laying the foundations for the New York Stock Exchange, established in 1817.

An exceptional group of items from Allaire's estate, including two hidebound **Account Books,** the first a 48-page 12mo record for "***P. Allaire & Co./ Manufactory,"*** containing numerous receipts for various payments made by Allaire for materials and labor in building and maintaining his properties in the years 1804-06. A typical page lists, in the merchant's idiosyncratic spelling, expenses for ***"Old House Repairs"*** including outlays to ***"patience, a Negroe Wench...Brooks, Painter...Gegrave: for a Cistern...sinking a little house...Diggin Garden...Mason for Repairs...Matt Hawkins Glazier...Bell Chiming piece..."*** Pages separated from cover, with overall wear and toning, otherwise in good condition. The second, retaining only eight of its original pages, has had part of its title scraped away, perhaps by Peter Allaire's children, for it contains, ***"Transactions Concerning George Yonge Allaire, In the County of Lycoming by Calicia Allaire, in the*** [years] ***1823 & 1824."*** Calicia was Peter's eldest child, who moved to Pennsylvania, and fell into a sharp dispute with her brother George after entrusting him with her finances in New York. With two **Manuscript Documents Signed** ***"P: Allaire,"*** July and December 1813, leasing ***"the Stable or back building on the Lots of Ground...Peter Obert now lives..."*** With an 1811 **Manuscript Document**, not signed by Allaire, affirming that ***"John C. Watson agrees to sell his house No.8 Harrison Street in the 5th ward for $3750...to the said Peter Allaire..."*** Also with a partly printed **Manuscript Document** from November, 1817, a receipt for Allaire's payment of ***"Fourteen & 78/100Dollars, being the balance on One Lot situate on Harrison street included in the Assessment for opening Canal-street..."*** Also with a 6-page **Manuscript Document** detailing ***"A true and perfect INVENTORY oa all the Goods, Chattels, and Credits, which were of Peter Allaire of the City of New-York, deceased...this 20th day of September 1820..."*** Finally, with a copy of the historical quarterly ***Now and Then,*** vol.VIII, no. 12, April, 1948, relating Allaire's account of his ordeal in the Bastille. A most interesting collection from one of the many regular merchants who played a role in creating the American financial system.

Nicest of only three found. The other example is slightly different and dates to 1807. In 1795 the trust, including George Washington and James Madison, who served on the Board of Directors, formed the Upper Appomattox Company to secure water rights to the river. The company originally barged rum upstream and tobacco downstream. The Foreign & Colonial Government Trust was the first ever investment trust, similar to today's mutual funds. The professionally managed funds were originally structured as "investment trusts". Extremely popular in London, Edinburgh and Dundee, the investment trusts were propelled by large amounts of surplus capital, low interest rates in England and a booming American economy. The appearance of the investment trust marked the beginning of a movement that played a major role in shaping the nation's savings and establishing Britain's supremacy in world commerce and trade in the late nineteenth and twentieth century.

Founded in 1868, the Foreign & Colonial Government Trust sought to tap investment opportunities and accumulating wealth. The founders' immediate inspiration for the Trust, however, was the Companies Act of 1862 and 1867 The Companies Act introduced limited liability, which restricted shareholders' risks to the money they had put up and the amount unpaid on their shares instead of their whole estate. Additionally, interest rates were low and British government securities were yielding about 3 per cent. Other foreign government issues, railway bonds and mortgages were available, offering a much better return, but were naturally less secure.

The Trust was founded as a means of garnering extra yield; however, the Trust's promoters had to offer something which cushioned the risks and conducted business with integrity and rectitude. In their original prospectus, their overall guiding principal was the following: "...to give the investor of moderate means the same advantages as the large capitalist in diminishing the risk of investing in Foreign and Colonial Government Stocks, by spreading the investment over a number of different stocks. "

The original 1,176,500 stock offered to the public was to be invested in eighteen issues of fifteen government stocks which were held in the names of five highly respected trustees. The trustees were appointed for life and were responsible for the management of the Trust. The public was cautious in the initial offering of stock and only 588,300 was taken up. The trustees pressed ahead with the Trust. In its first ten years' the Trust issued five series of Certificates bringing the nominal capital up to 3,500,00; and it formed a new trust, The American Investment Trust, which specialized in American railway stock. Soon, The Foreign & Colonial Government Trust had imitators, spurred by its example. By 1875 seventeen other trusts were quoted on the Stock Exchange. The investment trust movement had been born.

Pierre S. Du Pont (1739-1817) was a famous economist, a supporter of the American Revolution, and an advisor to French officials. As DuPont de Nemours, he sat in the French Revolutionary Assembly.

DuPont emigrated from France in 1799, and started the DuPont dynasty in the United States. DuPont not only formed a company which traded and transported goods to the New World, but gunpowder works near Wilmington, Delaware, ancestor of the DuPont Corporation today.

In 1802 Pierre went to France at the request of the American president to help with the negotiations for the Louisiana Purchase. DuPont organized this company to make investments in the newly acquired territory.

This is an extremely early and most important certificate with the signature of a famous American financier.

($1,000-1,500)

The Bank of San Carlos was established by King Carlos III in the 1770's as part of his scheme to revitalize the Spanish economy by creating a source of credit for Spanish industry and agriculture. The King also intended that this bank should handle the Spanish government's affairs. Declining shipments of gold and silver from North and South America limited the capital paid in by the government, as well as its deposits. Private capital payments also proved disappointing. In consequence, while the bank issued notes and paid its way, it was not able to do all the things its founder intended. Extremely Rare.

5176 **Real Compania de Commercio Establecida en Barcelona** 1758. Fancy certificate, with royal arms and those of Barcelona flanking the Virgin holding the Christ Child, flanked by a bishop, two saints and a priest. Underneath is the harbor at Barcelona, a fancy scroll with text and cupids with fruit and grape vines. **VF+**.* *($3,000-5,000)*

Another company chartered by Ferdinand VI to promote Spanish trade. Barcelona had long been a major commercial center in Aragon and in the trade of the Mediterranean. Its importance had declined with t he loss of the Spanish territories in Southern Italy, and this company was chartered with a view to reversing that trend.

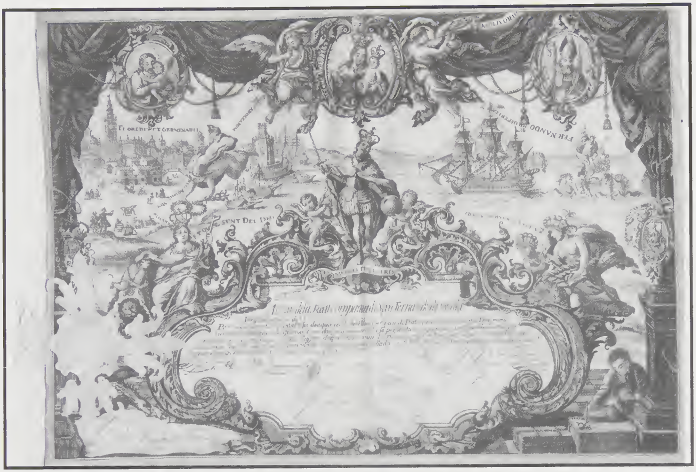
REAL COMPAÑIA DE FILIPINAS

Num. 10884.

Como Directores de dicha Real Compañia.

5177 **Royal Company of the Philippines** (Spain) 1785. **One share.** 250 Pesos. Royal arms and those of Carlos III at the top; lion and fruits. An elephant and ships at sides. Symbols of Manila, Spain and commerce with rabbit, sea turtle etc at bottom. **EF**.* *($1,000-2,000)*

This was a company set up by Carlos III of Spain (1759-1788), who was determined to revive the moribund Spanish economy. He reformed the Navy, broke the power of the Mesta, (the sheep growers association) chartered banks and trading companies and built roads and canals. He also reformed higher education. The shares for this firm cost 250 Pesos and were part of a scheme to improve the trade of Manila and expand it beyond the Manila Galleon, a ship that carried Spain's Asian revenues to Panama for shipment to Spain. This ship, with its valuable cargo, was an obvious target for pirates, privateers and hostile enemy fleets, Most of the reforms withered under the feebleminded Carlos IV.



5178 **Royal Company of Saint Ferdinand of Seville** (Spain) 1749. **Shares.** (Real Compania de San Fernando de Sevilla). Printed on parchment with hand-cut paper seal on wax. Ornate design shows the city and port of Seville under the protection of King Ferdinand III, who lived in the 13th Century and was named a Saint. King Ferdinand stands on a globe and is below a medallion vignette showing Holy Mary with the Christ Child. To the right of the King is a Spanish galleon representing Spain's mastery of the seas, which is represented by Neptune drawn by four swimming horses. Below Neptune are figures representing Indians pouring out a horn of plenty the riches of the Americas. There are numerous Latin inscriptions, among which are ME DUCE TUTUS ERIS ("Under my leadership you will be safe") **VF+**.* *($4,000-6,000)*

The shares of this company are perhaps the finest of the 18th century trading companies of Spain. The company was formed in 1747 with rights to trade with the colonies of Spanish America and flourished under royal patronage of King Ferdinand VI of Spain, who was a stockholder. The company was extremely important to Spain, as the precious metals of gold and silver so necessary to finance the state treasury came from their colonies. The company also promoted and expanded the important textile industry of Castille of which Seville was the capital. However corruption and poor trading practices brought the company to an end in the 1780's. The most beautiful classic European certificate.

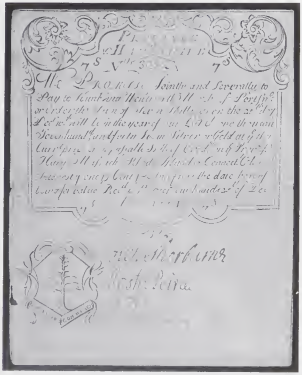
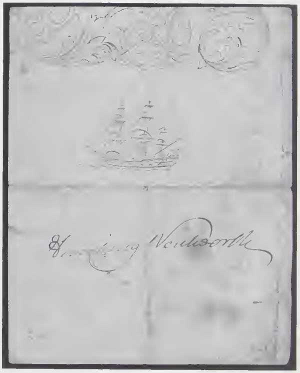
Rare and Desirable 1734 New Hampshire Merchants Note





5220 **New Hampshire.** 1734. *"We Promise* jointly and severally.... to Pay Hunking Wentworth of Portsmouth or order.." **Seven Shillings.** The Merchants Note Series. No.3082. An extremely important American note issue from a private commercial group. In 1734, Portsmouth was one of the leading commercial centers in all of North America and was a bustle of activity. The British Crown, of course, was attempting to constrict and control commercial ventures in its favor and often the Provincial notes of the Colony were in short supply. Numerous wars with the Indians in the northeast and French Canadians, occupied the British enough that an opportunity arose for some of the prominent businessmen of this community to band together and print this efficient note issue with distinctive designs and character. The British colonial authorities were, of course, not amused, but the notes circulated successfully. The motto on the face stresses commerce, the scroll work designs look official, but the back design is what makes this **one of the great American type notes** on any series. The ship vignette heading towards America is clearly a symbol of how the merchants got there and what made them a success. Trade was their bread and butter, and they were not going to let Colonial rules and regulations prevent them from making money. The note is signed on the back by Hunking Wentworth as the guarantor along with the three officials signing on the face. Although these are in the Rarity 5 range as established for fiscal paper (by Anderson) and obsolete private scrip notes, they are popular, tall notes with great style and vignette work. In last year's Ford III Sale, there were five examples sold, which was unprecedented. However, this did not depress the market, it stimulated it. A core note for a meaningful collection of American currency and a tangible piece of Americana that helped lay the foundation for the Independence movement. **Very Fine,** quarter folded with some foxing on the back. A small ink blot at the left edge. ***($12,000-16,000)***

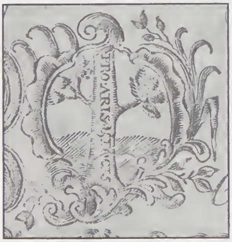
5221 **New Hampshire.** April 3, 1755. **Ten Shillings ($2/3 or 40s Old Tenor).** No.3020. Appreciation for the classic rarities in Colonial Currency is still in the developmental stage. There are amazing notes with rich histories that few have ever seen and that fact has held back this area of currency collecting. Most of the notes prior to 1760 from New England are so rarely encountered that few will ever see or handle them. This is one of those notes. The notes of the New Hampshire Crown Point issue are classic rarities and **there have perhaps been six or less notes** on the the market in the past three decades (three being in Ford III). We have not handled one since the great NASCA Guevrekian Sale in 1977.

The rarity of these early notes is easily explained. Beyond the 1750s, prior emissions were withdrawn from usage and destroyed. These special notes used to finance the Crown Point expedition used three denomination styles: Pounds, shillings, and pence, Spanish Milled Dollars, and the conversion to the "Old Tenor". The conversion rate was 15 Shilling New Tenor for One Spanish Milled Dollar. The April 11, 1755 Act created 30,000 Pounds Sterling of new Bills of Credit. Ten different denominations from Six Pence to Three Pounds were printed from two plates: a lower and a higher denomination. The bills paid 1% interest when paid in for taxes.



This example has the look of a **Fine or better** note. There has been restoration work done, as it had quarter splits from its heavy use. The edges have been strengthened. The workmanship was done in a professional manner, and since it is likely that the census on this note is **fewer than four** in private hands, the restoration work is not a flaw, but a service to the note, presenting it in the best light possible and enhancing its collectibilty. The eye appeal is quite sharp and the note was printed from a sharp and moderately worn plate state. In a few ways it is superior in appearance to the Newman Plate Note photo on page 231. On the entire Crown Point series, in private hands, it would be hard to believe that there are more than ten notes in private collections. It is a great rarity that relates to New Hampshire's methods of financing military needs in the Colonial era. ***($20,000-30,000)***

These notes were issued despite the Crown regulations against them. They were essential in raising funds for a series of skirmishes undertaken against French Forts. After the initial forays, the New Hampshire regiment was formed in September, 1755 under the care of Peter Gilman.

5223 **New Hampshire.** November 3, 1775. **40s.** No.2656. Hobart and Gilman. A sharply printed example from the Fowle print shop. At one time these were classified as counterfeits in the lexicon, but it appears they may either be from the official Fowle shop with different ornamental details, or part of the "spurious" operation of the elder Fowle (a Tory), who was arrested for counterfeiting, perhaps using stolen type from the shop of his nephew. As such, an excellent piece of history. Very professionally rejoined with the appearance of a **Choice Very Fine** note. ***($400-600)***

After the Revolution, there was an economic depression throughout New England. Small property holders who could not pay their taxes faced imprisonment. Town meetings talked of tax relief, and the issuance of paper money, but these issues were opposed by the legislators. Daniel Shay emerged as the leader of a localized rebellion which tried to close the courts in order to prevent action against debtors. Neither the Federal government, nor the state, would supply money for the militia to put the rebellion down, but some $20,000 was borrowed from "private sources", probably through a subscription campaign. On January 25, 1787, Shay and his supporters attacked a Confederation arsenal in Springfield, but they were repulsed by General Lincoln. Shay escaped to Vermont, and was eventually pardoned. This note is a receipt given to Abiel Smith for paying in the one hundred & twenty pounds subscribed by him to the "...Loan for procuring Provisions and Necessaries for the Militia ordered to Worcester..."

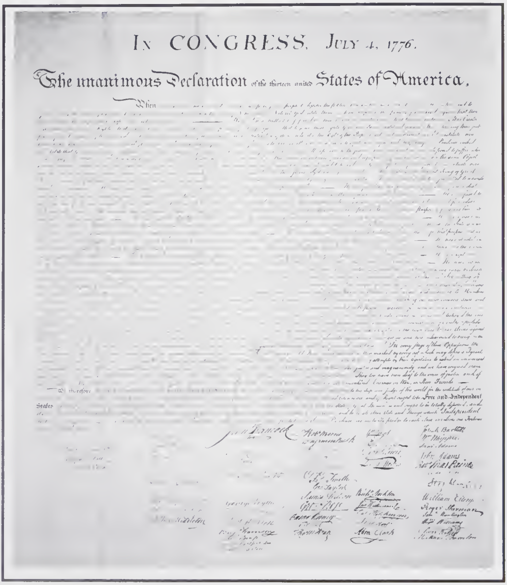
Scarce Peter Force Declaration Of Independence



IN CONGRESS, JULY 4, 1776.

The unanimous Declaration of the thirteen united States of America,

5253 **1848 Printed Peter Force Facsimile Broadside** of the Declaration of Independence printed from copper plates made from the original document. This copy, on rice paper, 29-3/4" x 25-1/4", was printed in 1848 by Peter Force using William J. Stone's 1823 plates and was included in Volume I of his series *American Archives*. In 1820, U.S. Secretary of State John Quincy Adams took charge of commissioning an accurate reproduction of the original Declaration. Copies were to be given to the three surviving signers of the document - John Adams, Thomas Jefferson, and Charles Carroll of Carrollton - as well as to President James Monroe, the state and territorial legislatures, and prominent colleges and universities. Adams engaged engraver William J. Stone of Washington to handle the printing. Stone used a wet-ink transfer process to create his copper printing plates, which required that the original Declaration be moistened to transfer some of its ink to the plates, which were then chemically treated to create an accurate impression of the original. This process further damaged the already-deteriorating Declaration, and the 201 facsimiles printed by Stone on parchment and vellum became far better examples of its original appearance than the document itself. Only 31 of Stone's originals are known to still exist, 19 of which are in institutional hands. In the 1840s, Congress authorized Peter Force to use Stone's plates to print up to 1500 facsimiles for his books compiling the nation's archives from 1774 through 1777. However, fewer than 1200, and perhaps only 700, were ever completed because Force did not receive enough subscriptions for the full run. Of those, perhaps half are still in existence. The present copy is evenly age-toned, with creases and light offsetting from having been folded into Force's book, a slightly irregular right edge, and three tears, but no paper loss, otherwise in choice condition. This seldom-encountered facsimile is as close to the original Declaration as one can get without tracking down one of Stone's copies and paying well over $100,000. A beautiful work and scarce, perfect for prominent display. ***($15,000-18,000)***

5254 **Washington Insurance Company in Providence.** March 14, 1806. Partly printed policy provided Two Thousand Dollars of insurance on the Ship Halcyon from Amsterdam, or the Trexel, to Cape De Verds and thence to New York. Light toning else, **VF+.** ***($100-150)***

5255 **Delaware. Delaware Lottery, 1772.** Ticket. No.9278. Boldly signed by ***William Alexander, Lord "Stirling".*** Ornate ticket with indent at the left and pattern borders on three sides. Signature are lower left as "Entered by". Verso endorsement, "This ticket I bought of W. Yeats and paid him Three Pounds 15s-George Moore", showing the ticket trading hands prior to the drawing. A winning ticket in choice condition. **Choice Very Fine,** a streak of very petty toning that is far away from the important signature. ***($1,800-2,400)***

William Alexander, "Lord Stirling", was an American Major General in the Revolution. His signature on a document signed is desirable, but on a lottery ticket especially so. The first we have handled.

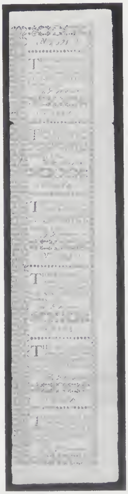
Rare King William Lottery Strip



5258 **Virginia. King William Lottery.** Uncut Strip of Six Signed and Issued Lottery Tickets. No. 2522-2526. **F-VF**, folds between the tickets and minor breakage along the folds. Dated 1764, signed *Jno. Moore*. A discovery item from a Virginia institution.

King William County in Virginia was granted a charter in 1702. The Moore family was a prominent Virginia family that held a large estate on the Mattaponi River in King William County. The owner of the estate, Bernard Moore, became entrenched in financial difficulties during the period this lottery was held. It was quite possible that the lottery was held on his behalf, although this could not be confirmed. There is evidence that George Washington, John Randolph, Carter Braxton and Benjamin Harrison held lotteries to liquidate much of the Moore properties. ***($1,000-2,000)***

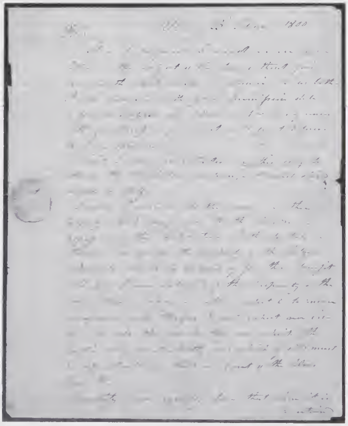
Letter to Richard Varick on Activities of the Manhattan Company



5260 **Manhattan Company ALS from Caleb Riggs, February 23, 1800 to Richard Varick.** An interesting content letter regarding the banking concern that became Chase Manhattan group.Caleb Riggs states he will not attack the Manhattan Company (underscored in his text), but stresses the Company should pay fair taxes, and that it be apportioned fairly among the citizens of New York City. He also mentions speculations that are not inherent in the scope of the company. This concern was an Aaron Burr vehicle in competition with Hamilton's Bank of New York. The Bank of New York was a funder of Federalist causes. **Fine or so**, but split on the fold, with a small chunk out from the wax seal removal. This touches some text. ***($1,000-2,000)***

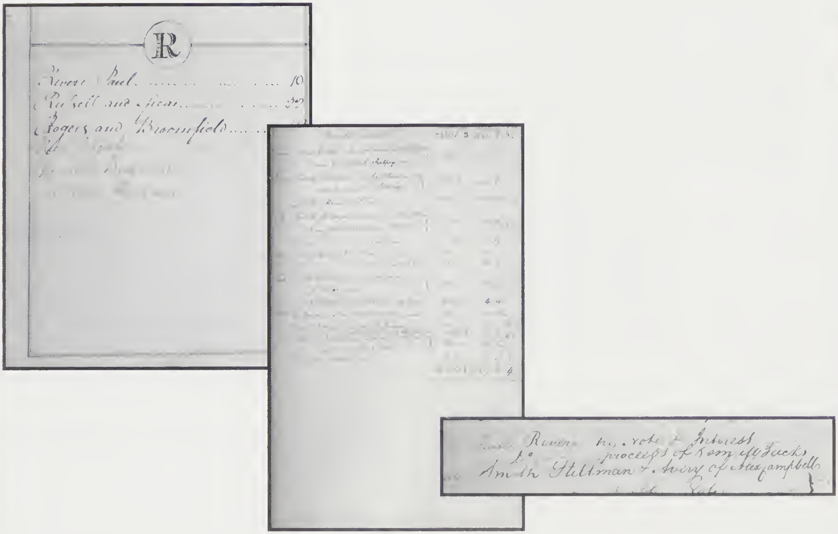
Account Ledger With Entries Concerning Paul Revere



R

Revere Paul 10

Rogers and Broomfield ......

5263 [REVERE, PAUL]: 1780s ACCOUNT LEDGER ***($3,500-Up)***

Patriot, master silversmith, and engraver; an instigator of the historic `Boston Tea Party"; made the legendary midnight ride from Boston to Lexington to warn John Hancock and Samuel Adams of the approach of British troops; blossomed in the public service, designing and printing 1775-1779 Massachusetts paper money (the Revere Sword in Hand, Codfish and Rising Sun issues); created and engraved the first official seal for the colonies and the state seal of Massachusetts, still in use; his post-Revolutionary career found him active in civil affairs and aggressively working for ratification of the Constitution; he prospered in his trade, crafting the graceful and beautiful silver pieces which still survive today; also a coppersmith, he produced bells and cannons, boilers for Fulton's new steam boats, and even fittings and accessories for `Old Ironsides," the U.S.S. *Constitution*. Exceptional bound manuscript **Account Ledger**, 272 pages, ca. 12-1/2" x 8-5/8", for an unidentified business or estate, apparently in Boston, Massachusetts. The ledger contains debits and credits for numerous accounts, including that of the great patriot and silversmith Paul Revere, for the years 1786-95. At that time Revere was a merchant as well as an all-around metalsmith, and the long list of credits to his account include ***"...parts proceeds of Goods rec'd of him and sold by*** [auctioneers] ***Russell & Clap*** [p] ***...for 2 pair Plated Candles Sticks...of Russell & Clapp for a Clock...of T. Pons for plated Goods..."*** Revere is also mentioned in six other places, in connection with debts and credits received indirectly through his business with the establishment keeping the ledger. Others mentioned are General Alexander Campbell, a major figure in that part of Massachusetts that would later become the State of Maine; Connecticut patriot General [Ebenezer] Huntington; and New England's prosperous Saltonsall family. There are also entries for Boston merchant Frederick William Geyer, who had been among the dozens of tories named in the Massachusetts Banishment Act of 1778; by the time covered by the present ledger, Geyer had returned to the United States after other former royalists met with success in suing to have their confiscated property returned to them. Cover is well soiled and slightly warped from moisture, cover of spine is absent, however the ledger's pages are age-toned, with light wear at edges, otherwise in very good condition. An excellent record of the financial life of the times, including that of one of America's most beloved patriots.

One Shilling

5825 **NC.** *Raleigh.* Trustees of the Raleigh Academy. **Ten Cents or One Shilling.** October 9, 1809. Pattern border encloses text with a lathe repeating pattern at the upper left. Signed by the Treasurer. A very important and early North Carolina change bill with a dual denomination. The note is evocative of notes listed in Newman if the time period for notes of this style in his reference were stretched a few more years, this would certainly be worthy of inclusion. An important piece as the plates notes in an important North Carolina currency book are from the American Antiquarian Society. Rarity 7 and in sharp grade. **Very Choice Almost Uncirculated.** *($3,500-5,000)*

The Academy was created in 1801, but was not operational until 1804 when the building was completed at a cost of $1,150.00. It operated for thirty years or so and issued three series of scrip notes.

This was the first endeavor by the Mormons to issue their own paper money. The plates were ordered before the Ohio legislature voted on the bank charter, which was, in fact, denied. The Mormons responded by organizing the Kirtland Anti-Banking Society, something they thought they would not need a charter for, and some of the notes were overstamped with "Anti".

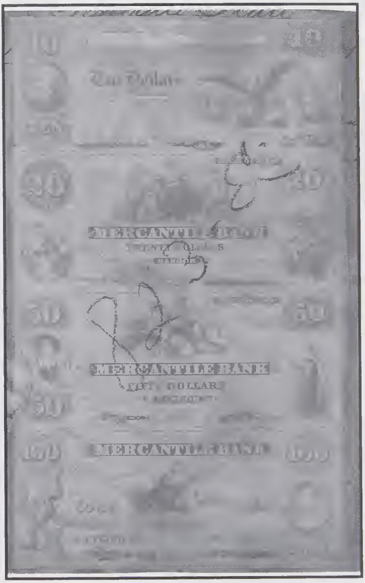
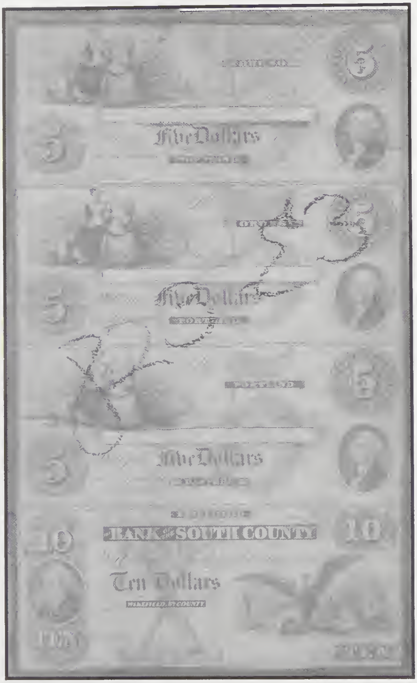
Enigmatic Proof Sheet From Maine



5946 **ME.** *Bangor.* Mercantile Bank. **$10-$20-$50-$100.** All red. Uncut sheet of four notes pasted on to moderately thick cardboard. All red throughout. Crayon notation diagonally across the sheet. The $10 note on top of the sheet has a blank space for the state, city, and for the bank title. John Hancock, left. An eagle and ship, right. The $20 note features Liberty, with her arms outstretched over two cherubs. Justice, left, and a woman, right. The state, city, and bank title are present on this example, and on the following notes. On the $50, two women sit near a cotton plant and a gear, a mill beyond. There is a girl wearing a hat, left. A boy touches corn plants, right. On the $100, a woman holds an arrow, and a cherub is next to her. There is another woman, right. According to Haxby, no notes of these descriptions were issued by the Mercantile Bank of Bangor, Maine. **Probably unique.** TCC - ABC. **Fine,** with a tear into the left end of the $50 note. Pieces out of the signature blocks. *($1,500-2,500)*

Is this a progress proof? The top note is unfinished. Is it a pull from a counterfeit plate? Why is it pasted on this unusual cardboard, and what does the writing at the top of the cardboard say? The cardboard the sheet is pasted on appears to be the material that the envelopes were made out of for the purposes of storing banknote plates at the American Bank Note Company (this cataloger observed many such plates and envelopes in an ABN warehouse. Several of the envelopes had sheets such as these pasted to them, as a means of quickly and easily identifying the contents). The partial letters visible at the top of the plate spell out "GENERAL PLATE". The quality of the engraving indicates that the sheet is a genuine ABN product. Further investigation shows that this plate was used by Toppan, Carpenter and Casilear to print notes for the South Berwick Bank of Thomaston, Maine (ME-550 G72,G80,G96 and G108). The Mercantile Bank of Bangor operated into the 1870s. The bank gave ABN an order to print $1 through $10 notes in 1859, and it may have given them another order in 1863. In order to save time and money, the original South Berwick plate could have been easily altered to suit this new purpose. ABN could simply add their monogram, and engrave the new city and bank title on to the old plate. In 1862, new legislation was passed, in the form of the National Banking Act, which made it impractical to issue notes from banks that were not part of the National Banking system. At that point, the order for the new notes may have been cancelled, and work on the plate suspended. Also see the following lot.

Another Enigmatic Proof Sheet

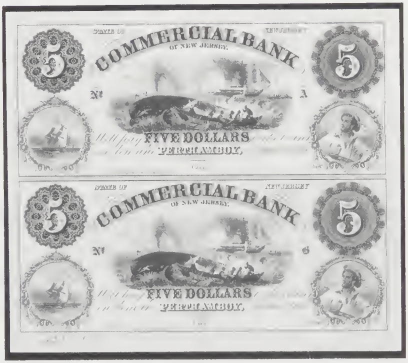


5947 **$5-$5-$5-$10.** Proof sheet of four all red notes pasted on to moderately heavy cardboard. Perhaps more enigmatic than the last sheet! The $5 notes feature a large, ornate 5, two women, left, and Washington, right. They have no bank titles, but they all have two different cities, Orono-Portland, Orono-Portland, and Portland-Danvers. The $10 note at the bottom of the sheet has a large, ornate X, John Hancock, left, and an eagle and ship, right. This note is for the Bank of the South County, Wakefield, Rhode Island. Haxby does not report any notes of these descriptions. **VF-EF,** with a crayon notation written diagonally across the sheet (this probably indicated the storage area in the warehouse for the plate). ***($500-750)***

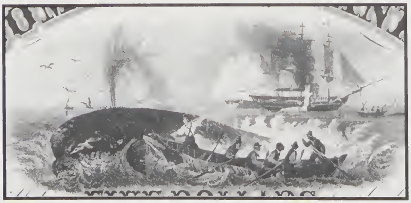
Almost certainly, this was the plate originally used to print the South Berwick, Thomaston, Maine $5 and $10 notes (ME-550 G60 and G72). Why there are two cities on the $5 notes is not clear. Please see the previous lot as well.

Scarce NBN Sheet

The $2 note has a boy on a horse waiting while his father talks to a miller. The $5 note has a man with a herd of cattle and sheep talking to a farmer and his wife. There is a basket of corn, left. NBN. **Uncirculated.** ***($400-600)***



5949 **NJ.** *Perth Amboy.* Commercial Bank of New Jersey. **$5-$5.** September 1, 1856. (NJ-445, G-44a (2) No protector). **Proprietary Modern Proof on card**. Whaling scene. Ship, left. Sailor, right. A beautiful, and very popular design, beloved by collectors, and by scam artists as well. This bank failed twice, once in 1851, and again in 1857. The notes became available for pennies on the dollar, and scam artists bought them. They altered the bank titles, states, or the city name, and found them easy to pass. DW. **Choice Uncirculated.** ***($1,000-1,500)***



5950 **SC.** *Charlston.* Bank of the State of South Carolina. **$1-$1-$1-$1.** 18_. (SC-45 B26b). Orange. **Proof** on India paper. Slaves load freight wagons on a dock. Calhoun stands, left. The $5 note has horses drinking from a trough, with sheep nearby. There is a girl with curls, right. Cows near a riverbank are featured on the $10 note, along with Marshall and Jefferson. (VA-240 G70 and G74). The bottom note is SENC, Haxby. **Fine or so,** with a small tear in the left edge of the top note. Unissued remainders. Danforth, Perkins. ***($400-600)***

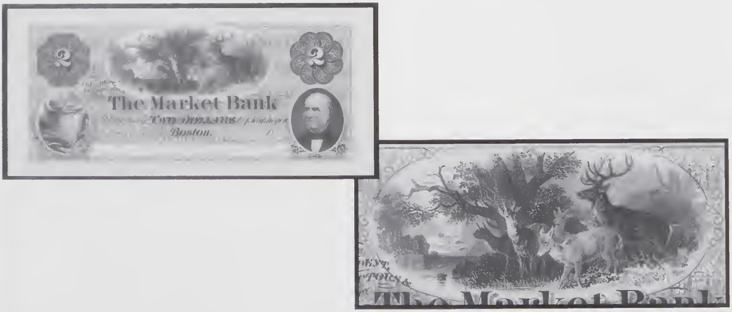
Security and Printing History

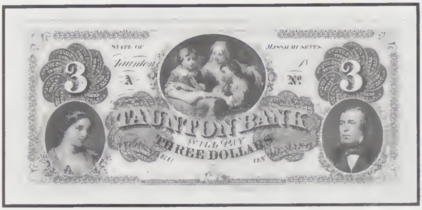
Security printing history is more a matter of pictures than of mere words. The ability of the bank note companies to make sales was dependent on two things. The first was a superior product to market with strong reputation and the second was the actual salesman. The following lots were once part of a small octavo size presentation or "sample" album that was either sent to a government official abroad or carried by a salesman to show examples of the firm's work. The proof notes and die proof vignettes included in this presentation album are evidence that the salesman for this particular firm, the National Bank Note Company, was armed with superior craftsmanship in an organized package to make the presentation to a foreign government or private client convincing and interesting. This album, like the few others we have seen, is unique in its content. The book included four United States Federal Proofs, four private bank proofs from the Obsolete Currency series and concluded with a series of individual die proof vignettes showing the various artistry of designs that could be selected for notes. The vignettes and dies included many of the classic designs used on the National Bank Note Company products including vignettes used on U.S. Loan Certifcates, the Confederate States of America Montgomery notes and vignettes that appeared on Amercan and foreign financial instruments. This book surfaced in London and it was likely used by a European based sales agent for presentations. The four United States government issued proofs would be very persuasive to a potential client. The craftsmanship certainly spoke for itself. At the time of this book's construction and use, 1861-1863, there were probably six American Bank Note Company sales people trawling for business versus one for the NBN. The NBN had superior technology for color tint lathe and counter dies. The ABN had more artists for vignettes and vastly superior production capability. The NBN also did excellent work for Latin American countries and even a private Stockholm bank. When the BEP was created, and those U.S. Government contracts left the NBN, it was logical that the NBN also merge into the ABN a few years after the Civil War.

Superb and Excessively Rare Market Bank of Boston $2 Color Proof



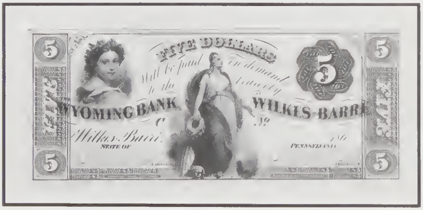
5984 **MA.** *Boston*. Market Bank. **$2.** 1860s. (MA-265 G16a SENC). Full red tint lathe. **Proof** on India paper mounted on card. Group of elk at a stream. Corn basket lower left and male portrait lower right. Intricate color lathe work derived from the Cyrus Durand patents with the city and title interwoven with the denomination protectors in a repeating pattern across the note. An absolutely stunning impression. The India paper mounted directly to a gilt edged wide margined card with an overleaf of tissue guard from the presentation album. Of the four obsolete banknote proofs from this book, this is the rarest. It is the **first we have handled** from this series. The only other note from this Market Bank series by the National Bank Note Co. we have seen was the Denly Collection note that came from the January, 2002 CAA Sale. This example has small POC and was remounted on the wide card smartly. Some minor edge wrinkling on the India. NBN. **Choice Uncirculated.** ***($3,000-5,000)***

Fabulous Vignette Presentation, Color Frame and Counter Details



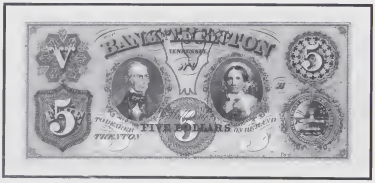
5985 **MA.** *Taunton.* Taunton Bank. **$3.** 1860s. (MA-1220 G62a). Green frame, imprint line and denomination counters. **Proof** on India paper mounted on card. A superb presentation with *The Young Students* at the top center. At the lower left is a female portrait and a stern male portrait overwhelmed by the grand scope of the rest of the proof. The color protectors run around the perimeter of the green frame with a subtle color vignette between the texts of the color imprint line. Across the top in green is the bank's license on the artwork for the note. In the centers are two exceptional scalloped counters with overlapped elements that incorporate the title and denomination. In the upper corners are similar counters in black and white. The India paper on card proof mounted on a gilt edge wide margin card with a tissue guard from the presentation book. It is easy to see why the NBN would use this note as a salesman or presentation type piece for clients or dignitaries. Thirty years ago, most considered this just a very rare Massachusetts proof note. However, the majestic artistry of this type and its context within a presention book opens up additional doors to those visionary collectors who seek to expand their collecting interests. This proof is right up there with the finest presentations created for obsolete currency. A standout for quality, rarity, and theme. NBN. **Choice Uncirculated,** the most trivial of pinpoint edge foxing on the India paper. ***($4,000-6,000)***

Superb Wilkes-Barre, Pennsylvania Color Proof by the National Bank Note Company



5986 **PA.** *Wilkes-Barre.* Wyoming Bank at Wilkes-Barre. **$5.** 1860s. (PA-715 G14a). Green frame, end panel protectors and signature spaces. **Proof** on India paper mounted on card. Standing *America* as used on the CSA $100 Montgomery issue. At the upper left a female portrait and at the upper right a scalloped counter with title, city and denomination. Ornate green end panels intersect at the bottom with a long panel in color with protectors and imprint line. Thin green frame line at the top. Plate position "C". The India paper proof on card is mounted to a gilt edged wide margined card with tissue guard protector. The presentation not as majestic as the first two obsolete proofs from this group, but a real beauty nonetheless. Listed in Haxby, we have seen only two others like it. Tied for the finest known from our experience and of course with the most intriguing pedigree. NBN. **Choice Uncirculated.** ***($3,000-5,000)***

Superb Full Red Color Tinted Proof on the Bank of Trenton, Tennessee by Danforth, Wright & Co.

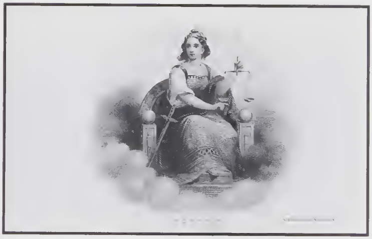


5987 **TN.** *Trenton.* Bank of Trenton. **$5.** Late 1850s-60s. (TN-235 G8a). Red lathework, outlined white protector "V" and deep red counter. **Proof** on India paper mounted on card. The note is dominated by the lathe and color tint. At the left is Henry Clay and at the right is Mrs. F.N.W, Burton, wife of the bank's founder (according the Roger Durand in *Portraits 3,* this is her claim to fame). The lathe pattern is dark red throughout with denominations in the bottom panels. At the bottom center is a deep red counter. Plate position "B". The India on card proof remounted to the gilt edged wide margined card with tissue guard from the presentation book. A superb proof and note the Danforth, Wright & Co. imprint line. Cyrus Durand was also the geometric patent genius behind the look of this artistic imprint of the 1854-1858 era of the pre-ABN merger. Though some of the vignette style went to the ABN. the technology to create these types of heavier scallop and detailed "snowflake" like counters (as at the upper left) departed with Cyrus Durand to the small, but initially very competitive National Bank Note Co. As a bank and type, **very rare.** We know of two proofs on a solitary sheet in the ABN Sale and the Paul Garland Collection note sold about two decades ago to a private collector. Once again, a note that can transcend a locale and cross over into the "big picture" significance of engraving history technology. Most of all this is a **note of great beauty and artistry.** DW. **Choice Uncirculated.** ***($2,500-5,000)***

Important Federal Vignette

5988 **Die Proof Vignette of "Spread Eagle" as used on the $100 Legal Tender from the Presentation Album.** India paper mounted on gilt edged card with tissue guard protector. A superb impression of this majestic vignette used on the $100 Legal Tender proof appearing in this sale from the Presentation Album. Minor tone spots on the card, the India lovely. ***($150-300)***

Please note that a 15% buyer's premium will be added to each lot purchased.



5989 **Die Proof Vignettes used on Federal Currency and Securities from the Presentation Album.** All India paper mounted on gilt edged cards with tissue guard protector. 1) *Justice*. Used on Oregon War Debt. 4) *Alexander Hamilton.* Used on the $50 Legal Tender note proof in this sale from the album and bonds. Some foxing patches. 5) *Lieut. CSA Montgomery Note Vignettes

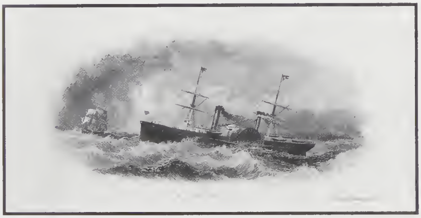
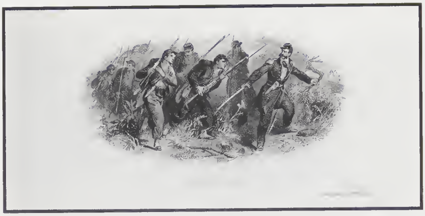
5990 **Die Proof Vignettes used on the Confederate States Montgomery Notes from the Presentation Album.** All India paper mounted on gilt edged cards with tissue guard protector. Used opposite Jackson on the Type 1. 3) *The Crossing*. Used on the $500 Type 2 and obsolete currency. One of the most important NBN vignettes. Titled and superior. Some tone spots on the card. 4) *America*. Used on the $100 Type 3. Also used on several Federal Bonds, the $1000 Two Year Note, and many obsolete notes by the NBN. In Durand, titled "Liberty" also. Edge tone spots, sharp example. 5) *Cotton Field*. Used on the $50 Type 4 and scarce (Bank of Savannah) to rare obsolete notes. This is a distinctly southern vignette and not used on Federal securities. Virtually pristine. **Choice** grouping. Superior examples and all titled. [5] *($500-1,000)*

Louisiana Note Matching Vignettes



5991 **Die Proof Vignettes used on Lousiana Notes from the Presentation Album.** Both India paper mounted on gilt edged cards with tissue guard protector. 1) *Adriatic.* The classic used on the "Dix" note and Commercial Bank of Providence Art work by Charles Parsons and engraved by Smillie, the NBN's "ace in the hole" in the engraver's department. $1 note. One spot on the the card. A **Choice** pair. [2] *($250-500)*



5992 **Die Proof Vignettes of Military and Civil War Scenes from the Presentation Album.** All India paper mounted on gilt edged cards with tissue guard protector. 1) *Scouting Party*. A group of Zoauves. Used on very rare U.S. Loans (July and August 1861). Minor toning. 2) *Army*. Used on $500 coupon bond of July and August, 1861. 3) *The Standard Bearer*. A classic used on a Federal Loan. Tone spots on the India and the card. Still a choice trio. [3] *($250-500)*

5993 **Die Proof Vignettes of Nautical Themes from the Presentation Album.** All India paper mounted on gilt edged cards with tissue guard protector. 1) *Ship Yard*. Might be used on the Market Bank of Boston series. Very rare vignette. 2) *Unloading*. Used on several obsoletes such as Maryland, Jersey City, etc. 3) *Off the Harbor*. Used on obsoletes and Federal Bonds such as Oregon War debt. India rather toned. 4) *U.S. S. Frigate Niagara.* Some toning on the India. Lovely group, despite some toned examples. [4] *($250-500)*

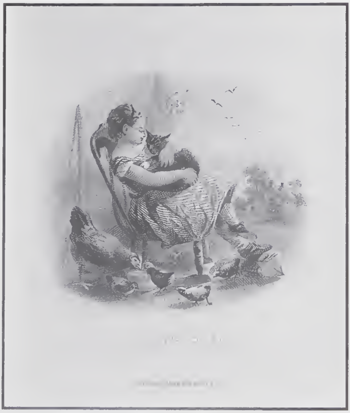
5995 **Die Proof Vignettes of Industrial Scenes of Woman and Children from the Presentation Album.** Both India paper mounted on gilt edged cards with tissue guard protector. 1) *Spinning*. Used on several tougher obsolete notes. One tone spot. 2) *The Loom.* Used on obsolete. Large tone spots on card. [2] *($100-200)*

Some Rare Scenes



5996 **Die Proof Vignettes of Pastoral and Agricultural Scenes from the Presentation Album.** All India paper mounted on gilt edged cards with tissue guard protector. 1) *Lucy's Pets*. Rare on obsolete and used on a Bolivian bank loan. Meow! 2) *Milking Time*. Used on Lebanon Valley Bank, PA. 3) *Home*. Used on several obsoletes. 4) *In the Hayfield*. On rare NBN notes such as Taunton Bank etc. 5) *Agriculture*. Used on obsoletes (Hampden Bank, Easton, PA etc.) and Federal Loans. A **Choice** group. [5] *($300-600)*

The cover of the vule titled *VIGNETTES/OF AMERICAN BANK NOTES*. The same lettering is on the spine. All separated prior to disbinding. Scuffed lightly. *($100-200)*

The "American" on the covers is of course the key to this book's purpose of being a likely European and Latin American sale tool.

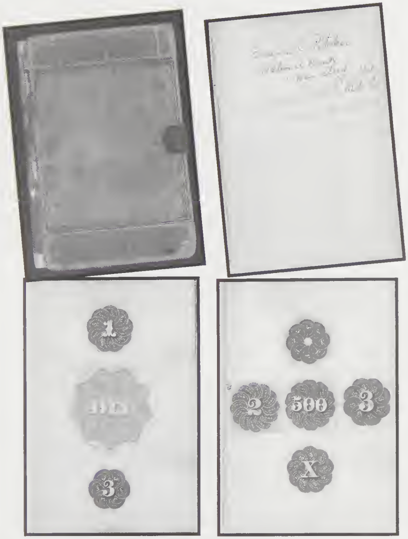
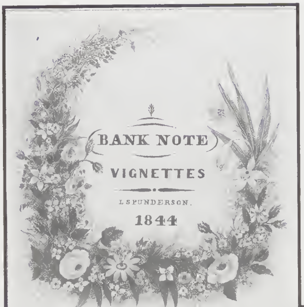
Unique National Bank Note Company Sample Counter Ledger

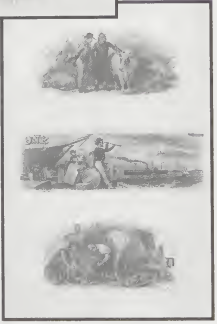


6001 **National Bank Note Company Record Log of Die Counters and Panels.** Octavo. Brown half skin leather ledge book with brass clasp. Hand inscribed on inside front cover "Edwin L. Pitcher/National Bank/1 Wall Street, New York" in black pen. Penciled below in nearly identical text. Small sepia albumen photo of a house on lake inside front page. Their are 31 leaves of the ledger with India paper elements cut from lathe printing. These are primarily counters, geometric swirls and repeating lathes used on many National Bank Note Co. products from the 1860-1864 period. These include several used on Federal Bonds, Louisiana obsolete notes (including a green essay counter for the "DIX" note and the final "DIX" note back counter in red), and many classic NBN printed banks. There is also a U.S. Treasury Seal in red printed on glossy card. All are organized in a manner used by Mr. Pitcher. We would think he was a transfer die technician or lathe operator, not an engraver or a salesmen. However, the book may have been used for counter selections as it is a handy pocket size. No matter what, **unique.** The end spine is rather worn, the contents **Fine.** Fascinating piece of NBN history.

($1,000-2,000)

Unique Lemuel Punderson Engraver's Vignette Scrapbook





6002 ***Bank Note Vignettes.*** **Lemuel Punderson 1844.** Octavo. Full black morocco with gilt inside details. Ribbed spine with title "SCRAP/BOOK" in gilt. Gilt edged pages. A scarpbook hand put together by Punderson for the purpose of archiving his engraved vignette work from the late 1820's and on. There are 114 pages with glued on India paper vignettes and cutouts from notes. Most of his work (at least what is in the book) appears to have been with the Draper imprints of DT, DTL and later with the early TC imprint. However, there are pages with portraits from the FDU and A.B. & C. Durand & Wright period. He may have apprenticed and worked on parts of these (such as a detail). Several vignettes are titled in his hand we believe. Great themes such as historical, nautical, whaling, and allegorical scenes are featured. Later vignette work from Wellstood is in this book as well. If he worked on all the vignettes in this ledger record, his accomplishments were strong and contributions important. Famous vignettes include the *Battle of New Orleans* by DTL, *Weetamoe* by WHW and *Iranistan* by DB. A **unique** record and priceless to the right collector. Pages seperating from the spine. The leather lightly scuffed. Externally **Fine,** a future rebinding might be in order. ***($2,000-3,000)***

A short biography places Punderson in the 1850's period in New York and New Haven (New Haven Green vignette in book). This may have been the most influential period of his work. Did he participate on the DT and DTL work or was he just a collector. These artists are footnote characters in security printing history.

HINTS FOR BIDDING BY FAX OR MAIL

Bidding in auctions can sometimes be a real challenge, but bidding by mail presents its own set of issues. Many dealers and collectors are not able to appear at auction in person, yet want to participate in the bidding process. Experience has taught us ways to minimize frustrations, and maximize results for those bidding by mail, and we would like to share some of those ideas with you. Here are the questions we are asked most often, and some of the suggestions we have made to bidders submitting mail bids. We think they will save you time and money, as well as help you win lots you might otherwise miss.

"I can't come to your office to view lots, but I want to know more about a particular lot before I bid on it."

Lots are available to be viewed at the times and places posted in the front of the catalogue. We often bring lots to conventions, and there is no better way to learn about numismatics or scripophily than to attend a convention, view auction lots, and talk to dealers and collectors. But if you can't view items personally, here is how we can help you get a better idea of what you are bidding on:

1) Call us, and we will be happy to have one of our experts describe any lot you ask about.
2) We can arrange to copy most items and we will FAX or mail the copies to you at a nominal charge. We can also scan items and email images.
3) If you have established credit with us, we may be able to ship lots to you for direct viewing.

Please realize that requests for phone assistance, for copies or for shipping lots directly to you must be arranged well in advance of the closing date of the sale, and that a cost may be charged for these services.

"I have a limited budget and although there are many items I would like to bid on, I am afraid of exceeding my budget."

There is an easy way to solve this problem. It is called a "limit" bid sheet. Let's look at an example. Mr. Smith collects Confederate notes, and he sees that there are over thirty lots he would like to buy. His budget is $1,000, but the estimates on the thirty lots he likes add up to well over $5,000. If he bids on all thirty, he might win them all and exceed his budget. To be safe, he bids on only ten, and he wins only one lot for a $100. Mr. Smith is disappointed because he missed the chance to bid on all thirty lots. He could have bid safely on all thirty lots and increased his chances of improving his collection by submitting a "limit" bid sheet. Here is how it works:

Mr. Jones has the same collecting interests as Mr. Smith. He has the same $1,000 budget. Mr. Jones bids on all thirty lots he is interested in. He writes at the bottom of his bid sheet "Please limit my total winning bids to $1,000." Every time Mr. Jones wins a lot, we keep track of his total spending. When the total reaches $1,000, we will stop applying his bids. We did what he would have done had he been at a live auction. We spent only what he budgeted for.

"What if there are three similar lots, and I only want one?"

"#101 OR #102 OR #103 at $200" will work perfectly.

"I bid $30 on a lot that was estimated at $100, and I didn't get the lot. Later, when I got the Prices Realized, the lot was reported as unsold. Why didn't I get the lot?"

The Terms of Sale state that bids less than 60% of the estimate will not be accepted. As auctioneers, we have a responsibility to the consignors as well as the bidders. Any bid that is considered to be less than the "...regular market value..." of the item may be rejected by the auction house. Keep this in mind when making bids below the estimates given.

We hope these questions and answers have been helpful. If you have any comments, suggestions, or further questions concerning Smythe auctions, please feel free to call us at 800-622-1880, or 212-943-1880.
